

**LEPPCO FLORASCENT** is a blended glycol deodorant - disinfectant which kills odors and disinfects by chemical action. For deodorizing, it is only necessary to spray **LEPPCO FLORASCENT** toward the ceiling to remove such odors as cooking and stale smoke. The odors are effectively destroyed and the room is left with a fresh, lingering scent.

**LEPPCO FLORASCENT** does not cover up undesirable odors, but actually destroys the cause of such odors at their source. Damp, musty, mould producing areas are easily controlled by regularly spraying with **LEPPCO FLORASCENT**. Be sure areas are thoroughly dampened. In severe mould conditions, a thorough cleaning prior to spraying may be necessary.

**CAUTION** KEEP OUT OF REACH OF CHILDREN
