

DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Rinse empty container with water and place in garbage.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink **PROMPTLY** a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbiturate drug.

This product is toxic to fish. Do not discharge into lakes, streams or ponds.

DESCRIPTION and DIRECTIONS

KLEAR POOL CONCENTRATE kills algae in pools and tanks. It is compatible with the usual water treatment chemicals. It is non-volatile, colorless and non-corrosive in use dilutions. Use of **KLEAR POOL** makes the chlorine last longer. See service man for suitable test kit.

1. When no algae is visible or pool is freshly filled, use 1 qt. of **KLEAR POOL** per 50,000 gal. of water.
2. If algae is already present, add 1 qt. of **KLEAR POOL** for each 20,000 gal. of water. When algae is withered, clean pool. If necessary, drain and refill, adding 1 qt. of **KLEAR POOL** per 50,000 gal. of water.
3. If water is recycled after treatment as in 1 or 2 above, add 1 qt. **KLEAR POOL** per 50,000 gal. of water every 5 to 7 days. This should keep the active ingredient at 2 to 5 ppm. This is necessary to prevent further growth.
4. If pool water is not recycled or filtered, it should be tested periodically so as to maintain 2 to 5 ppm. active ingredient. 1 qt. **KLEAR POOL** in 50,000 gal. of water will provide the 2 to 5 ppm. active content.

HANDY DILUTION CHART

Pool Volume: Gals	20,000	40,000	50,000	100,000
Amt. of Klear Pool to Prevent algae:	13 oz. liquid	26 oz. liquid	1 qt. liquid	2 qt. liquid
Amt. of Klear Pool to Kill algae:	1 qt. liquid	2 qt. liquid	2.5 qt. liquid	5 qts. liquid
