

NORTH COAST

SEP 30 1985

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No.

KLEARSQL 66

Wash Sanitizer

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseat container. If possible isolate container in open air or well-ventilated area. Flood with large volume of water if necessary.

NET CONTENTS

KLEARSQL 66 Wash Sanitizer is recommended for use in spray machines to sanitize and clean eggs prior to sale. KLEARSQL 66 Wash Sanitizer is also recommended for use in sanitizing dishes, glasses, food processing equipment and utensils including dairy and brewery equipment and utensils.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For egg wash: Dissolve one ounce of KLEARSQL 66 Wash Sanitizer in ten gallons of warm (125° F) water. This provides 100 ppm of available chlorine. With a conveyor type machine, spray with the 100 ppm available chlorine solution and allow eggs to drain and dry. Eggs may be rinsed with potable water if desired. For dishes, glasses, food processing equipment and utensils: dissolve one ounce of KLEARSQL 66 Wash Sanitizer per ten gallons of warm (125° F) water. This provides 100 ppm of available chlorine. Clean and rinse items prior to sanitizing. Then dip the items to be sanitized in solution, hold for two or three minutes and remove, allow to drip dry. The same solution may be used in the feed tank for immersion or spray-type machines providing two to five minutes contact time for sanitizing dishes, glasses and food processing equipment and utensils. The items are then ready for use. The sanitizing solutions should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional KLEARSQL 66 Wash Sanitizer should be added to maintain a minimum concentration of 100 ppm available chlorine

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of a decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.
