

**NEW HIGH-SUDS FORMULA
MEETS ALL RESTAURANT,
BAR, GRILLE AND FOUNTAIN
NEEDS**

INHIBAC is particularly designed for the eating or drinking establishments which may have only two-compartment sinks. Its proved formula, combines effective detergents, water conditioners, grease emulsifiers and quarternary ammonium bactericide. It sanitizes eating and drinking utensils, dishes and tableware while they are being washed. It further holds down bacterial populations in the wash water, retarding recontamination.

Since any germicide is gradually inactivated by food and grease accumulations, it is essential to change both wash and rinse water at reasonable intervals.

USE DIRECTIONS

FOR CLEANING

Lightly soiled areas — surfaces to be cleaned should be mopped or brushed with a solution containing 1 ounce of INHIBAC per gallon of water. Rinse cleaned area with fresh water.
Heavily soiled areas — mop or brush soiled surface with a solution containing 2-3 ounces of INHIBAC per gallon of water. Rinse cleaned surface with fresh water.

GENERAL PURPOSE DISINFECTION

To disinfect walls, floors and other hard surfaces in homes, schools, restaurants, rest rooms and other public areas, mop or brush surface to be treated with a solution containing 1 ounce of INHIBAC per gallon of water. Surfaces that are heavily soiled should be cleaned with 2 ounces of INHIBAC per gallon of water and then disinfected. Those surfaces which may later come in contact with food must be rinsed with clear water of drinking quality.

SANITIZATION

To sanitize walls, floors and equipment in food processing plants, first clean thoroughly with a solution containing 1 ounce of INHIBAC per gallon of water.
