

[1803-10]

CON-O Brand Mill Spray is a finished insecticide, in ready to use form, for control of insect pests of stored grain, stored food and food products. It may be used as a surface treatment or as a contact spray in standard or special equipment.

CON-O Brand Mill Spray contains piperonyl butoxide. It kills on contact the exposed (or accessible) stages of the granary weevil, rice weevil, confused flour beetle, ruck red flour beetle, cadelle, saw toothed grain beetle, spider beetles, angoumois grain moth, Mediterranean flour moth, meal worms, cigarette beetle, drug store beetle, cheese skipper, cheese mites, grain mites, and many others.

CON-O Brand Mill Spray is useful in mills, elevators, granaries, warehouses, food storages, and other situations where an effective, fast-acting insecticide is required. As a space or vapor spray, it gives rapid kills of flying and crawling stages. As a surface treatment it leaves an insecticide residue which is effective in the control of many insects.

CON-O Brand Mill Spray can be used around grain, food, food processing utensils, containers, food handling and processing equipment, but should not be applied directly to grain or uncovered foodstuffs and food products.

DIRECTIONS

Surface Treatment

The treatment of exposed surfaces with CON-O Brand Mill Spray not only gives rapid initial kills of the accessible stages of most stored grain and food products insect pests, but results in an insecticide residue which kills many insects that alight on, run or crawl over them. For use as a surface insecticide, apply in a good machine adjusted to deliver a coarse droplet spray, using approximately 1 gallon of material to each 750 square feet of surface. Repeat application as needed.

Space Spray

For rapid control of flying, running and crawling stages of many common insect pests, use CON-O Brand Mill Spray in a good machine adjusted to deliver a fine mist. Whenever possible, keep doors and windows closed for 10 minutes after application. Against flying pests, direct the spray toward the upper portions of the enclosure, filling the room with mist and using 2 to 4 ounces of material to each 1000 cubic feet of space. In the control of active stages of running and crawling pests, direct the mist toward and into all places commonly inhabited by these insects and spray liberally all protected hiding and breeding places.

CAUTION

This insecticide is an oil base material and should not be stored, sprayed, or otherwise exposed toward or near an open flame.

Use the product as a space spray in food processing plants only when plant is not in operation. Food should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

Harmful if swallowed

Cover or remove aquaria in areas to be treated
