DANGER—POISON—PRECAUTIONS

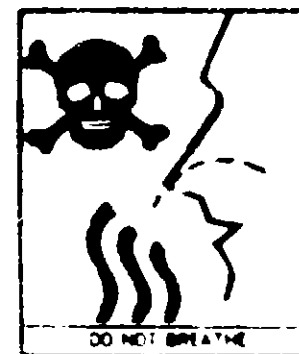

POISONOUS IF SWALLOWED

This product is poisonous if swallowed. Do not swallow. If swallowed, get medical attention immediately.

POISONOUS BY SKIN CONTACT

Be cautious if touched by hands or pulled on. When on skin, wash with soap and water. If liquid goes through clothes, remove and wash.

POISONOUS IF BREATHED

Breathing vapors, spray, mist or dust may be fatal.

POISONOUS TO FISH AND WILDLIFE

This product is toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from treated areas. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

USE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE EQUIPMENT AND CLOTHING

1. Wear waterproof pants, coat, hat, rubber boots or rubber over shoes. 2. Wear safety goggles. 3. Wear mask or respirator approved by the U.S. Bureau of Mines for parathion protection. 4. Wear heavy duty natural rubber gloves.

WORK SAFETY RULES

Keep away from water, persons and animals away from treated areas. Do not allow drift.

Do not use in or near water. Do not use in or near crops. Do not use in or near buildings. Do not use in or near livestock. Do not use in or near poultry. Do not use in or near swine. Do not use in or near horses. Do not use in or near dogs. Do not use in or near cats. Do not use in or near birds. Do not use in or near fish. Do not use in or near wildlife.

POISON SIGNS (Symptoms)

Headache, dizziness, nausea, vomiting, diarrhea, muscle twitching, loss of consciousness, convulsions, respiratory distress, and death. If these symptoms appear, get medical attention immediately.

STOP—READ LABEL BEFORE USING!

POISONOUS TO FISH AND WILDLIFE

This product is toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from treated areas. Do not apply where runoff is likely to occur.

Do not contaminate water by cleaning of equipment or disposal of wastes.

ALWAYS WEAR THE FOLLOWING PROTECTIVE EQUIPMENT AND CLOTHING

Wear waterproof pants, coat, hat, rubber boots or rubber overalls, and safety goggles. (3) Wear mask or respirator approved by the U.S. Bureau of Mines for parathion protection. (4) Wear natural rubber gloves.

WORK SAFETY RULES

Keep unprotected persons and children away from treated area. There is danger of drift.

Do not touch eyes or mouth with hands. If you feel sick in any way, stop work and get help right away. Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to parathion and describe his condition. After first aid is given (see First Aid Section) and if a doctor cannot come, take victim to clinic or hospital.

Before removing gloves, wash them with soap and water. Wash hands, face and arms with soap and water after using, eating or drinking.

After work, take off all work clothes and shoes. Shower, using hot water. Wear only clean clothes when leaving job. Do not reuse contaminated clothing. Wash protective clothing and protective equipment with soap and water after each use. Respirator must be cleaned and filter replaced according to instructions in respirator manual.

POISON SIGNS (Symptoms)

Parathion is a very dangerous poison. It rapidly enters the body on contact with all skin surfaces and eyes. Clothing wet with this product must be removed immediately. Exposed persons must receive prompt medical treatment or they may die.

The signs and symptoms of poisoning are: Headache, nausea, vomiting, dizziness, weakness, blurred vision, pin-point pupils, tight chest, labored breathing, nervousness, sweating, watering of eyes, pooling or frothing of mouth and nose, muscle spasms.

4 / 0 METHIL

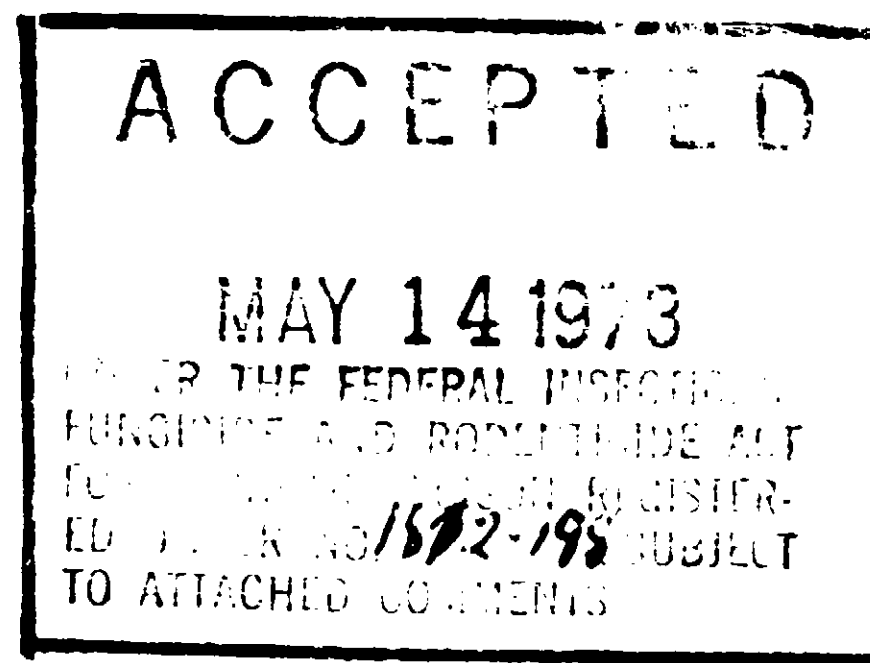

ACTIVE INGREDIENTS:

Parathion [O, O-Diethyl O-p-nitrophenyl phosphorothioate] 2%

O, O-Dimethyl O p-nitrophenyl phosphorothioate 3%

INERT INGREDIENTS 95%

TOTAL 100%

+ FIRST AID TREATMENT +

Call a doctor (physician), clinic or hospital immediately. Explain that the victim has been exposed to parathion and describe his condition.

If breathing has stopped, start artificial respiration immediately and maintain until doctor sees victim.

If swallowed and victim is awake (conscious) make him vomit quickly. Induce vomiting by sticking finger down throat or by giving soapy or strong salty water to drink. Repeat until vomit is clear. Never give anything by mouth to an unconscious person. Have victim lie down and keep quiet. See doctor immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. See doctor immediately.

Methyl Parathion is a cholinesterase inhibitor and treatment of severe poisoning should include the use of atropine. Toxaphene produces central nervous system excitation which responds to the barbituric acid derivatives. We would feel that these treatments do not conflict with one another, but that a physician with the information listed above, and especially if he has the information contained in the booklet entitled "Clinical Handbook on Economic Poisons," should be able to treat a patient suffering simultaneously from both M. Parathion and Toxaphene poisoning. This booklet was prepared by the U.S. Department of Health, Education, and Welfare, Public Health Service, Communicable Disease Center, Atlanta, Georgia.

5 / 0 METHIL

NOT FOR HOME USE

NOTE TO PHYSICIAN

Antidote—administer atropine sulfate in large doses, TWO to FOUR mg. intravenously or intramuscularly as soon as cyanosis is overcome. Repeat at 5 to 10 minute intervals until signs of atropinization appear. 2 PAM chloride is also antidotal and may be administered in conjunction with atropine. DO NOT GIVE MORPHINE OR TRANQUILIZERS. Parathion is a strong cholinesterase inhibitor affecting the central and peripheral nervous systems and producing cardiac and respiratory depression. At first sign of pulmonary edema, the patient should be given supplemental oxygen and treated symptomatically. Continued absorption of the poison may occur and fatal relapses have been reported after initial improvement. VERY CLOSE SUPERVISION OF THE PATIENT IS INDICATED FOR AT LEAST 48 HOURS. TREAT SYMPTOMATICALLY.

POST TREATED AREA

Consult your State Agricultural Extension Service or Experiment Station regarding posting treated areas.

CAUTION: Misuse as to quantity, timing or method of application can cause damage or injury to animals, persons, property or crops or cause residues in excess of official tolerances.
