BERMUDAGRASS PASTURES

Newly Sprigged

Directions For Use:

It is a violation of Federal Law to use this product in a manner inconsistent with it's labeling.

BERMUDAGRASS PASTURES (Newly-Sprigged)

Apply 0.8 to 2.4 quarts after planting and before emergence of Bermudagrass or weeds. Alternatively, for control of emerged annual weeds up to 4 inches in height, apply 0.4 to 0.8 quart per acre; add a surfactant per 25 gallons of spray. If bermudagrass has emerged at time of treatment, temporary burn of exposed plant parts may occur. Plant sprigs (stolons) 2 inches deep in a well-prepared seedbed. Do not treat areas where sprigs are planted less than 2 inches deep as crop injury may result. Do not graze or feed foliage from treated areas to livestock within 70 days after application.

IMPORTANT:

All applicable directions, restrictions, or precautions on the EPA registered use label are to be followed. This labeling contains new or supplemental instructions for use of this product which may not appear on the package label. Follow instructions carefully. This labeling must be in the possession of the user at the time of pesticide application.

ACCEPTED

JUN 23 2003

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
