GENERAL INSTRUCTIONS

K-POOL algaecide provides effective control of algae growth in all types of swimming pools. Even though it affords long term algae control, periodic additions on a scheduled basis will assure lasting algae control. Treated water may be used immediately after addition of K - POOL. K - POOL is designed to prevent the growth of swimming pool algae. For heavy algal infestations, more drastic treatment such as super-chlorination may be required to eradicate the algae.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

NOTE: Undiluted K-POOL or concentrations above 1.0 ppm Cu++ may be injurious to crops, grass, ornamentals and other foliage. Do not apply in such a way that the concentrated product comes in contact with crops, ornamentals, grass or desirable plants. Apply only as specified on the label.

Dilute K - POOL with at least nine parts of water and sprinkle around edge of pool. Add additional amounts of K - POOL every two weeks according to directions on the chart.

For best results begin pool maintenance with K - POOL when the pool is first filled with water. Add K- POOL according to the size of pool as given in the chart.
