## TO HUMANS AND DOMESTIC ANIL

## CAUTION

Causes eye imtation. Harmful if swallowed, abostbed through the skin, or inhaled. Avoid contact with skin, eyes or clothing. Wear protective clothing, Wash thoroughly with soap and water after handling.

#### ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on this label.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label. Do not apply this product in a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons.

#### RE-ENTRY STATEMENT

Do not enter treated areas without protective clothing until sprays have dried. Because certain states may require more restrictive re-entry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product.

#### STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage and disposal. Do not contaminate water when disposing of equipment wash waters. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate if allowed by state and local authorities. If burned, stay out of smoke.

#### DIRECTIONS FOR USE AND CONDITIONS OF SALE AND WARRANTY

IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.

#### GENERAL INFORMATION

METURON 80 DF effectively controls selected annual grass and annual proadleaf weeds with no injury to cotton when used in accordance with label directions. METIJRON 80 DF will provide effective control of the following weeds:

#### ANNUAL GRASS WEEDS

Barnyardgrass

Crowfootgrass

Goosegrass

Brachiaria

Fall Panicum

Ryegrass

Craborass

ANNUAL BROADLEAF WEEDS

Buttonweed Guathead

Pigweed

Sesbania

Groundcherry (Wright) Cocklebur

Lambsquarters Purstane

Sicklepod

Tumbleweed Prickly Sida (Ironweed or Teawood)

Mamined

Florida Pusiey

METURON 80 DF is not effective for control of perennial weeds.

### APPLICATION INSTRUCTIONS

METURON 80 DF readily mixes with water. To assure thorough mixing the spray tank should be 1/3 to 1/2 full of re adding METURON 30 DF. If other products are tank mixed, add in the following order:

- (1) dry flowables,
- (2) wettable powders,
- (3) liquid flowables,
- (4) emulsifiable concentrates
- (5) surfactants or compatibility agents.

Should poor mixing occur with any product, dilute the product equal parts of water before adding to the spray tank. In cotton where a nilutogen solution may be used as a camer, METURON 80 DF must be thoroughly slurned in water before adding to nitrogen solution.

Before mixing METURON 80 DF with nitrogen solution check for compatibility. Thoroughly mix METURON 80 DF with 2 tablespoons of water. Then mix the sturry with the nitrogen solution 1 tablespoon of METURON 80 OF per pint of nitrogen solution equals 2.5 pour is in 25 gallons ladjust accordingly for other rates) and allow to stand for 5 minutes. The products are compatible when no lumping, curdling or gellation exist, and when any separation carries readily remixed. If METURON 80 DF should settle out when mixed with the nitrogen solution, a compatibility agent may be used to improve suspensibility. Adding the compatibility agent at its recommended rate, usually 1 to 2 pints per 100 gallons (1/8 to 1/4 teaspoon per pint for test), inay improve mixture with hitrogen solution.

To maintain a uniform spray mixture, use bypass or mechanical agitation in the test tank. To reduce foaming, bypass agitation should and in the bottom of the tank. The spray mixture should never be left in the tank without constant agitation. Spray aguipment must always be thoroughly clauned before acciviing METURON 80 OF as residues of other pesticides can alter the results from METURON 80 OF even to the point of causing serious crop injury. Do not apply this product through any type of imgation system.

#### EQUIPMENT

Uniform distribution is essential for most effective weed control, fan type nozzles are generally most effective for herbicide application. Uniform distribution may also be influenced by spray pressure and volume, for ground application use no less than 10 gpa for preplant incorporated and preemergence treatment; and 20 gpa for postemergence.

For banded applications use rates of METURON 80 DF and carrier proportional to broadcast. Dividing row width by band width and multiplying by the rate per acre broadcast will give the amount of METURON 80 DF needed on the band.

Cotton					METURON 80 DF provides effective weed control when at preemergence or posternergence to control and weeds. In areas, a very light incorporation immediately folic application to the soil may improve weed con Posternergence METURON 80 DF may be applied as dire semi-directed or over-the-top spray to cotton. Tank mit with most liquid nitrogen solutions can be done preemergence application only. To be most effective METURON 80 DF in a program using preemergence, early emergence (cotton 3 to 6 inches tall), and late posternerg (lay-by) applications.  PRECAUTION: The use of this product on light silt and sandy in organic matter may result in serious crop injury or stand loss, or slightly eroded areas are particularly subject to this injury.
		Pargiant Incor- pasition (Asizona & New Massico Only)	2 pounds		After beds are prepared for pre-plant irrigation, a METURON 80 DF broadcast. Application should follow full irrigation with planting as soon as possible after irriga Treatment must be made before beds are dragged of planting. A bed shaper should be used to remove 1 to 2 in from the beds after treatment, Irrigation water should neallowed to puddle or pond over beds.
		Presmergence Treatment	1.25 to 2.5 pounds		On light silt and sandy soils, low in organic matter, us lower rate. METURON 80 DF may be applied to the sui of the soil, or lightly incorporated into the soil, after plai cotton.
:.		Pentermarganice Transferrance	polyces	3 inches to lay-by	METURON 80 DF may be applied posternergence to co and pre- or posternergence to weeds. Application ca directed, semi-directed or topical to cotton. The higher should be used when weeds have emerged. The use surfactant at a rate not to exceed 0.5% of spray volunt 1 pint per 25 gallons of water may increase activity on we
mbinations 1 Overlays otton)	Trilin or other		1.25 to 2.5 pounds		METURON 80 DF may be applied preemergence following preplant incorporated application of Trilin or other triflurations for use rates of Trilin or other triflurations and precautions.
	Prowing		1.25 to 2.5 pounds		METURON 80 DF may be applied preemergence following preplant incorporated application of Prowl. Follow recommendations for use rates of Prowl and precautions.
	Zorial <sup>®</sup> Rapid 80		1.25 to 2.5 pounds	·	METURON 80 DF may be applied preemergence follows preplant incorporated application of Zonal Rapid 8 preemergence in combination with Zonal Rapid 80, Follow recommendations for use rates of Zonal Rapid 80 precautions.
	DSMA / MSMA		1.25 to 2.5 pounds	3 inches to bloom	METURON 80 DF may be tank mixed with DSMA or MS and applied as a postemergence directed spray to confollow label recommendation for use rates of DSMA or MS and precautions. Addition of a surfactant at 0.5% of sixulume (1 pint per 25 gallons) will enhance performance, mixture should be applied in such a manner as to avoid correction foliage to avoid injury. Do not graze treated a or feed treated forage or gin trash to livestock.
		Mixing Instructions			When tank mixing, products should be added to the stray in the following order: First fill tank 1/2 to 2/3 full of w. Second, add wettable powders, water dispersable granules dry flowables. Wettable powders m'y resid to be premissured) in a small amount of water. Third, add liquid flows to tank. Then emulsifiable concentrates may be added, add surfactants. Agitate vigorously during the mixing and after.
		Precautions			The herbicidal activity of METURON 80 DF may be less under dry conditions; however, rainfail Lufficient to germi seeds and grow the crop will usually activate METURON &
					Interaction between METURON 80 05 when appresent or early posternergence and preemergapplications of systemic insecticides may result in crop in METURON 80 DF should not be applied more than three to the systemic insecticides.
					to the same crop or field in a year. Do not plant three to then cotton within six months of the loct METURON & application as injury may result.
					ARIZONA, CALIFORNIA and NEW MEXICO: With exception of cotton, corn and grain sorghum which ma planted the next spring, do not plant other crops to METUI 80 DF treated areas for one year, METURON 80 DF is no be used on coarse-textured soil of less than 1% organic magnificant.
					ARKANSAS, LOUISIANA AND MISSISSIPPI (only): A METURON 80 DF at one bound on sandy loam soil lo organic matter.

GEST AVAILABLE COPY

WEST TEXAS (only): METURON 80 DF is not to be used on sandy, loamy sand or fine sandy loam soils not on cotton planted in furrows
