11/15/95

NOVEMBER 15, 1995

Mr. Joe Mares
Griffin Corporation
PO Box 1847
Valdosta, GA 31603-1847

Dear Mr. Mares:

Subject: Addition of Fire Ants
Volcano Ant Bait
EPA Registration No. 1812-348
Your Submission Dated June 23, 1995

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that you make the labeling change listed below before you release the product for shipment bearing the amended labeling:

1. Delete the labeling claim "revolutionary." Words or phrases implying that a product possesses unique characteristics because of its composition are not acceptable. Also the product has been in the market place since 1992 surpassing the 6 month period we normally allow for use of the word "New" on product labeling.
2. Delete the phrases "even on food preparation surfaces or next to food." The Agency discourages reference or recommendation for use of pesticides next to food or food utensils regardless of its packaging. Such terms are considered vague and have the potential to mislead the user with respect to the safety of a pesticide.

Submit three copies of your final printed labeling before you release the product for shipment. A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager (13)
Insecticide-Rodenticide Branch

Registration Division (7505C)

| | | |
|--------------------|----------------|---------------------------|
| Effective Against: | Argentine Ants | Cornfield Ants |
| | Fire Ants | Variety of Household Ants |
| | Pharaoh Ants | |

32 Child Resistant Baits

Griffin Corporation
Valdosta, GA 31601

Net Weight 2.24 oz.

EPA Reg. No. 1812-348
EPA Est. No. 56027-WI-2

11/15/95
1812-348

For commercial, industrial and residential use including: food processing plants, eating establishments, food marketing-storage-distribution, hospitals, nursing homes, schools, office buildings, apartments, laundries, buses, aircraft, boats, museums and zoos.

Ants are attracted to the bait in Volcano Ant Baits. The bait food is carried back to the nest to kill the queen and destroy the entire colony.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Break Volcano Ant Baits apart from the plastic frame before placement.

Place baits by ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place baits on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur. To apply baits to vertical surfaces use the enclosed stickers.

Do not use residual sprays with or near Volcano Ant Baits.

Ants will begin to feed - population reduction and less activity can be expected in about a week.

FOR EFFECTIVE CONTROL

Use 3-4 baits for the average size room

Use 6-8 baits for heavy infestations.

Bait stations are designed to be visually inspected with a flashlight. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption).

Volcano Ant Baits are packaged in a Child Resistant Container.

STORAGE AND DISPOSAL STATEMENTS

STORAGE: Store in a cool, dry area inaccessible to children.

DISPOSAL: Wrap container and put in trash collection.

ADDITIONAL LISTED USE SITES FOR Volcano Ant Baits

Greenhouse (Commercial), Household: closets, basements, attics, recreation rooms, kitchens, bathrooms, dining rooms, pantry and food storage shelving.

Transportation Facilities: Trucks and trailers, containerized units, railroad cars, recreational vehicles, shipping containers.

Food and Feed Processing Plants: bakeries, bottlers, canneries, dairies, creameries, milk processing plants, feed mills, feed stores, fresh and dried fruit packing and processing, wineries, wine cellars, flour mills, machinery, warehouses, bins, elevators, egg processing, candy and confectionery plants, sugar-processing, cane mills, dry food products plants, beverage processing, nut processing, cereal processing, seafood processing, vegetable oil processing, farinaceous processing (noodles, etc.).
