

DIRECTIONS FOR USE IN SWIMMING POOLS:

General Classification

It is a violation of the Federal law to use this product in a manner inconsistent with the label.

Initial Dose: Add 1 quart of 10% BTC 776 to 50,000 gallons of pool water.

Maintenance Dose: Add 1 quart of 10% BTC 776 to 50,000 gallons of pool water.

Initial dose is used when first pool of the season is treated. If pool has visible algae growth, add 1 quart of 10% BTC 776 to 50,000 gallons of pool water. Vacuum pool after 24 hours to remove algae debris. If algae are still present, repeat the treatment procedure as necessary. When pool is free of algae, add the recommended maintenance dose.

Maintenance dose should be added at 3-day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added to the rate of more than 10% per week of pool capacity, add 1 quart of 10% BTC 776 to each 10,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 quart of 10% BTC 776 to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the springing of the pool before it is returned to use the following season.

When 10% BTC 776 is used as directed it will retard the development of *Chlorella pyrenoidosa* (green algae), *Scenedesmus mundatum* (black algae), *Phormidium* (blue-green algae), *Lyngbya versicolor* (blue-green), and other swimming pool algae. 10% BTC 776 is compatible with most commonly used swimming pool chemicals, but should not be mixed with algaecides, other water-treating chemicals. 10% BTC 776 works best when added by itself directly to pool water. 10% BTC 776 is non-corrosive to masonry surfaces.

DIRECTIONS FOR USE IN SPAS/WHIRLPOOLS: HOT TUB

Initial Dose: Add 12.8 ounces of 10% BTC 776 per 10,000 gallons of water. Initial dose is used upon filling of Spa/Whirlpool Hot Tub Bath.

Maintenance Dose: Add 3.2 ounces of 10% BTC 776 to 10,000 gallons of water. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or Spa/Whirlpool Hot Tub Bath has unusually heavy use, add maintenance dose more frequently.

Drain and clean Spa/Whirlpool Hot Tub Bath at least once a month or as needed depending upon bather load.

PRECAUTIONARY STATEMENTS

DANGER

Keep out of reach of children. Corrosive. Causes severe eye irritation. Do not get in eyes or on skin or clothing. Wear rubber gloves when handling. Harmful to fish and wildlife. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink 2-4 cups of a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent convulsions may be controlled by the cautious intravenous injection of a short acting barbiturate drug.

ENVIRONMENTAL HAZARDS FISH AND WILDLIFE PRECAUTIONS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of waste.

STORAGE AND DISPOSAL

- DO NOT CONTAMINATE WATER, OR FOOD, OR FEED
- BY STORAGE OR DISPOSAL
- OPEN DUMPING IS PROHIBITED
- DO NOT REUSE EMPTY CONTAINER

Pesticide Disposal: Pesticide containers should not be reused. If empty, they should be disposed of in a way that is approved for pesticides disposal in the area.

Container disposal: Do not reuse empty containers. Return to dealer or destroy by incineration or other approved method.

ONYX
CHEMICAL
COMPANY

**ONYX 5% BTC 776
Swimming Pool Algaecide
(EPA# 1839-89)**

Onyx 5% BTC 776 swimming pool algaecide is a concentrated swimming pool algaecide which keeps pool water free and clear of visible algae. Controls algae slime in both swimming pools and outside spa whirlpool hot tub baths.

When Onyx 5% BTC 776 swimming pool algaecide is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngbya versicolor* (blue-green) and other swimming pool algae.

DIRECTIONS FOR USE IN SWIMMING POOLS:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Initial Dose: Add 1 quart of 5% BTC 776 to 25,000 gallons of pool water.

Maintenance Dose: Add 1 quart of 5% BTC 776 to 25,000 gallons of pool water.

Initial dose should be added weekly during the swimming season. If pool is used frequently, add 1 quart of 5% BTC 776 after 14 days. In heavily used pools, algae are often present and may require additional treatment as necessary. When pool is free of algae, use the recommended maintenance dose. Maintenance dose should be added at 14 day intervals if temperatures prevail or pool is heavily used. Add maintenance dose more frequently.

If make up water is added at the rate of 1 inch per week of pool capacity, add 1 quart of 5% BTC 776 for each gallon of fresh make up water added per week. When swimming season is over, add 1 quart of 5% BTC 776 to 25,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the pool when it is returned to use the following year.

When 5% BTC 776 is used as directed it will not prevent development of Chlorophyta, cyanobacteria, or other non-mundatum (black) algae. Phormidium, Nitzschia, and Lyngbya versicolor (blue-green) and other winter algae.

5% BTC 776 is compatible with most commonly used swimming pool chemicals, but should not be mixed with any oxidizing water-treating chemicals. 5% BTC 776 should be added directly to pool water. 5% BTC 776 is not corrosive to masonry surfaces.

DIRECTIONS FOR USE IN SPAS/WHIRLPOOLS/HOT TUB BATHS

Initial Dose: Add 2.6 ounces of 5% BTC 776 to 25,000 gallons of water in the whirlpool, hot tub, or bath.

Maintenance Dose: Add 1.4 ounces of 5% BTC 776 to 25,000 gallons of water. Maintenance dose should be added at 3-5 day intervals if high temperatures prevail or Spa/Whirlpool/Hot Tub Bath has unusually heavy use. Add maintenance dose more frequently.

Drain and clean Spa/Whirlpool/Hot Tub Bath at least once a month or as needed depending on bather load.
