

General Classifications

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Directions For Use In Swimming Pools:

Initial Dose: Add 1 gallon 5% BTC 2125M Swimming Pool Algaecide to 25,000 gallons of pool water.

Maintenance Dose: Add 1 quart 5% BTC 2125M Swimming Pool Algaecide to 25,000 gallons of pool water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of 5% BTC 2125M for each week 5,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1 gallon of 5% BTC 2125M to 25,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season. When 5% BTC 2125M is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae.

5% BTC 2125M is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water-treating chemicals. 5% BTC 2125M works best when added by itself directly to pool water. 5% BTC 2125M at use dilution is non-corrosive to inanimate surfaces.

Directions for use in Spas/Whirlpools/Hot Tub Baths

Initial Dose: Add 25.6 ounces of 5% BTC 2125M Swimming Pool Algaecide per 5,000 gallons of water. Initial dose is used upon filling of Spa/Whirlpool/Hot Tub Bath.

Maintenance Dose: Add 6.4 ounces of 5% BTC 2125M Swimming Pool Algaecide per 5,000 gallons of water. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or Spa/SHirlpool/Hot Tub Bath has unusually heavy use, add maintenance dose more frequently.

Drain and clean Spa/Whirlpool/Hot Tub Bath at least once a month or as needed depending on bather load.

ONYX
