### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Powder Detergent/Disinfectant is a phosphate-free formulation designed to provide effective cleaning, deodorizing, and disinfection specifically for hospitals, nursing homes, and other institutions where housekeeping is of prime importance in controlling the hazard of cross-contamination.

This product, when used as directed, is formulated to disinfect inanimate, hard non-porous surfaces such as walls, floors, sink tops, tables, and chairs. For larger areas such as operating rooms, patient care facilities, and restrooms, this product is designed to provide both general cleaning and disinfection.

Use this product to clean and disinfect hard, non-porous surfaces of personal protective safety equipment (PPE), athletic equipment (helmets, headgear) and non-medical breathing apparatus (respirators, gas masks).

This product deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, and any other areas which are prone to odors caused by microorganisms.

**PACKETS** – Tear open packet—follow label dilution instructions and discard opened packet according to label disposal instructions.

*Water soluble packet*—follow label dilution instructions by dropping packet directly into water. Do not remove packets before use. Store in cool dry place. Do not handle packets with wet hands.

**DISINFECTION** - To disinfect inanimate, hard non-porous surfaces add one (1/8 oz., 5.75 gm or ½ oz.) pre-measured packet of product or measure powder at the following use dilutions:

<b>Add this amount of product:</b>	1/8 ounce (3.55 grams)	5.75 grams	½ ounce	1 ounce	1½ ounces
<b>in warm water to make:</b>	One Quart	52 ounces	1 Gallon	2 Gallons	3 Gallons

Stir gently to form a uniform solution. Apply solution with a mop, cloth, sponge or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes and then let air dry.

For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use.

**DISINFECTION and CLEANING of NON-MEDICAL PERSONAL PROTECTIVE EQUIPMENT (PPE):**

Pre-clean heavily soiled, hard, non-porous surfaces of the equipment prior to disinfecting. Add 0.5 oz. of (this product) (product name) to one gallon of water (or equivalent use dilution). Stir gently to form a uniform solution. Apply solution to the hard, non-porous surfaces of the equipment with a cloth, sponge, hand pump trigger sprayer or by immersion. Thoroughly wet all surfaces to be disinfected, allow to remain wet for 10 minutes. Wipe off any excess solution with a clean cloth, rinse the treated surface with potable water and let air dry prior to storage. The user must comply with all OSHA regulations (Code of Federal Regulations Title 20, Part 1910-134) for cleaning respiratory protection equipment.

**PRECAUTION:** Disinfection and cleaning at temperatures above 120°F will cause distortion of personal protection equipment (PPE) necessitating replacement.

**BACTERICIDAL ACTIVITY** - At the stated Disinfection dilution rate, this product exhibits effective disinfectant activity against the organisms: Pseudomonas aeruginosa PRD-10, Escherichia coli, Klebsiella pneumoniae, Salmonella (schottmuelleri) enterica, Salmonella (choleraesuis) enterica, Brevibacterium ammoniagenes, Streptococcus faecalis, Shigella dysenteriae, Staphylococcus aureus, Enterobacter aerogenes and meets all requirements for hospital use.

**MILDEWSTAT** - To control mold and mildew on pre-cleaned, hard, non-porous surfaces mix this product at the stated dilution rate for Disinfection. Apply solution with a mop, cloth, sponge or hand pump trigger sprayer making sure to wet all surfaces completely. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mildew growth appears. At the disinfectant dilution rate, this product is also fungicidal against the pathogenic fungi, Trichophyton mentagrophytes.

\* **VIRUCIDAL ACTIVITY** - This product, when used on environmental, inanimate, hard surfaces at the Disinfectant dilution rate, exhibits effective virucidal activity against HIV-1, Influenza A<sub>2</sub>, Parainfluenza Type 1 (Sendai), Canine Distemper, Feline Pneumonitis, Vaccinia virus, Herpes Simplex Type 1, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV).
