### CHEMISTRY

1. The requirements of PR Notice 91-2 were satisfied. The nominal concentration of the active ingredients given in the proposed new Basic CSF and Alternate Formulations # 1 through # 7, all dated 11/28/06 agreed with the percentages declared on the label.
2. The upper and lower certified limits for both the active and inert ingredients were acceptable.
3. Both of the active ingredients utilized are EPA registered. All inert ingredients utilized in the proposed new formulations are cleared for use in pesticide formulations. The new orange fragrance variant from Alpine was cleared and added to the inert database.
4. The study reports under MRID # 470043-01, #470043-02 and #470043-03 contained data responding to the requirements of OPPTS Test Guidelines Series 830, Group A or Group B. The data provided is acceptable.
5. All other elements of this submission were acceptable. The proposed new Basic CSF and new Alternate Formulations #1 through #7, all dated 11/28/06 were acceptable.

### EFFICACY

1. The proposed label claims that the towelette product, Stepan Disinfectant Wipe, is an effective disinfectant on hard non-porous surfaces against the following microorganisms in the presence of organic soil (5% blood serum) for a contact time of 5 minutes:

Escherichia coli 0157:H7	Pseudomonas aeruginosa
Salmonella enterica	Staphylococcus aureus
Streptococcus pyogenes	Herpes simplex virus type 1
Herpes simplex virus type 11	Influenza A2 virus

The data provided support these claims

2. The proposed label claims that the towelette product, Stepan Disinfectant Wipe, is an effective sanitizer on hard, non-porous, non-food contact surfaces against the following microorganisms for the contact times listed:

Campylobacter jejuni	1 minute
Escherichia coli 0157:H7	15 seconds
Klebsiella pneumoniae	15 seconds
Listeria monocytogenes	15 seconds
Staphylococcus aureus	15 seconds

The data provided support these claims

3. Making the following changes would improve the proposed label:
  - Move the following statement from the bottom of page 6 of the proposed label {or insert a similar statement} to the "Disinfecting" section under "Directions for use". **For heavily soiled surfaces, clean before following disinfecting instructions".**
  - Revise the "**Sanitizing**" section title (see page 5 of the proposed label) to read "**Sanitizing/Deodorizing**". This revision will ensure that the proposed label meets DIS/TSS-16 requirements (e.g, adequate dosage recommendations and complete directions for use of the product as a deodorizer must be provided in labeling).

- On page 7 of the proposed label, under the first "Container/Disposal" section, change "before discarding trash" to read "before discarding in trash".

A stamped copy of the accepted labeling is enclosed. Submit three (3) copies of your final printed labeling before distributing or selling the product bearing the revised labeling.
