

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

Inhale liquid, vapor and mist. Pesticide if swallowed. May be absorbed through the skin. May produce irritation of the eyes. Avoid breathing of vapor or spray mist. Avoid contact with skin and eyes. Wash thoroughly after handling. Avoid contamination of food or foodstuff.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Keep out of any body of water. Birds feeding on treated areas may be killed. This pesticide is highly toxic to bees exposed to direct treatment or to residues remaining on the treated areas. Do not apply when bees are actively visiting the crop, cover crop or weeds blooming in the treated area. Applications should be timed to provide the maximum possible interval between treatment and the next period of bee activity.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

1. PROHIBITIONS

Do not contaminate water, food, or feed by storage or disposal. Open dispensing prohibited.

2. PESTICIDE DISPOSAL

Pesticide, spray mixture, or rinsate that cannot be used or chemically processed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

3. CONTAINER DISPOSAL

For containers of 30 gallons or more, resell container and offer for reconditioning or triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill, or bury in a safe place. For all containers, of any size, triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill, or bury in a safe place.

4. GENERAL

Consult Federal, State, or Local disposal authorities for approved alternative procedures.

DIRECTIONS FOR USE

1842-38

Triangle Pine Beetle Spray is a concentrated insecticide miscible with either water or fuel oil for use in controlling the turpentine bark beetle on live trees. One quart contains 0.25 pounds of Lindane and is sufficient for treating 20 average sized trees, (8 to 10 inch trunks). Fuel oil is slightly more effective as a diluent but may damage lawns, in which case water should be used as a diluent.

This is a concentrated insecticide and must be diluted for use. Mix 1 part of concentrate with 11 parts of water or fuel oil for use. Wet trunks of trees thoroughly with drenching spray, to a height of about 15 feet above the ground, or at least above pitch tubes. For F.P.S Beetles, trunk should be sprayed up to top. Trees are to be sprayed preferably in May or June, or whenever infestation is noted. Repeat each spring and through summer if necessary.

WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
