DIRECTIONS FOR USE

This is a concentrated insecticide and must be diluted for use. Trees are to be sprayed preferably in May and June, or whenever infestation is noted. Repeat each spring and through summer if necessary.

For **Black Turpentine Beetle**—Mix 1 gallon of concentrate with 14 gallons of fuel oil. Wet trunks of trees thoroughly with drenching spray to a height of 15 feet above the ground or at least above the pitch tubes.

For **IPS Beetle**—Mix 1 gallon of concentrate with 30 gallons of fuel oil and drench tree trunks all the way to the top.

For **Ambrosia Beetle** in logging operations as a preventative treatment, mix 1 gallon of concentrate with 55 gallons of fuel oil and drench logs as soon after felling as possible. If logs are already infested mix 1 gallon of concentrate with 14 gallons of fuel oil and drench logs thoroughly.

WARRANTY

Seiler warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
