

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING!

Harmful if swallowed. May be absorbed through skin. Causes skin irritation. Avoid breathing vapor or spray mist. Do not get in eyes, on skin, or on clothing.

STATEMENT OF PRACTICAL TREATMENT

If swallowed, do not induce vomiting. Call a physician immediately. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL AND CHEMICAL HAZARDS

Combustible: Keep away from heat, sparks or open flame. Use with adequate ventilation.

STORAGE AND DISPOSAL

1. Do not reuse empty container.
2. Wrap container and put in trash collection.

Reg. # 1842-130

(11-2)

COPPER NAPHTHENATE CN-2

WATER REPELLENT — WOOD PRESERVATIVE

<i>Inert</i>	Active Ingredients	100%
	• Petroleum distillate	80%
<i>Solvent</i>	• Copper Naphthenate	20%
	• Equivalent to 2.0% metallic copper.	

A ready to use preservative containing 2% metallic copper as Copper Naphthenate, for preventing insect attack and decay of wooden structures, and cotton or other cellulose fabrics. Dry or cured posts and lumber will not burn the skin on short contact. May be painted over when dry. Ideal for greenhouse and nursery use.

KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For Treating Fence Posts - Fill a container with posts to be treated and pour in preservative until container is full. Posts should be peeled and dry before treatment. Soak 24 hours. The posts may be set out any time thereafter. If only a few posts are to be treated soak part that contacts ground for 24 hours and paint upper portion several coats with brush or spray.

For lumber such as millwork, framing, sheathing, subflooring, rough work, lawn furniture, crates, boxes, greenhouse benches, etc., dip for 3 minutes for each inch of thickness. If preferred, spray or brush with a single coat. If the wood is to be used in contact with the ground, soak as for fence posts or apply 2 or more coats by brush or spray. Treat all freshly sawed ends with swabs or brush. Allow to dry thoroughly before painting.

For Termites Already in Building. Locate and destroy tunnels. Replace badly damaged wood with new treated pieces. Soak exposed wood with preservative by spray or brush. Apply generously to joints and cracks. Treat soil around foundation and pillars with approved soil treatment such as Triangle Die-Termite. This product will not control Termites already in building, but Termites which are contacted by the product will be killed.

Tents, Tarpaulins, ropes, burlap, etc., should be dipped in the solution. Allow to dry thoroughly before use. For additional water repellent add 1 pound paraffine to each 10 gallons of solution.

The pleasing green color imparted to the wood is permanent in protected locations, but bleaches out when exposed to weather. The preservative qualities are not lost by this bleaching - only the color is lost.

For treating clay pots in nurseries to prevent algae growth in pots, dip pots in this solution and allow to dry before using. Use only on clean pots. Some retardation of plant growth in recently treated pots may be expected.

NOTICE OF WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
