For use in households, restaurants, dairies and food processing plants

KILLS flies, mosquitoes, gnats, clothes moths, carpet beetles, silverfish, ants, fleas on premises, bedbugs, exposed stages of certain pantry pest beetles, moths, weevils and roaches

DIRECTIONS FOR USE

For Flies, Mosquitoes, Gnats

For best results use a good spray or fogging machine adjusted for a fine mist. For combating flying insects, aim the spray toward the ceiling and fill the atmosphere with mist. Fog the entire room thoroughly to envelop bodies of insects to be killed. Whenever possible, keep doors and windows closed for ten minutes after spraying. Use 1 1/2 ounces insecticide per 1,000 cubic feet of closed room space.

For Control of silverfish, ants, roaches and exposed stages of weevils, certain pantry pest beetles and certain other crawling insects, spray into ant trails, areas around door sills and window frames where pests enter, also into cracks and crevices where pests are often found. It is always best to hit these insects directly with the spray. Sweep dead and stunned insects, and dispose by burning. Repeat when necessary.

For Clothes Moths, spray thoroughly onto woollen clothing, especially the seams and folds and clothing receptacles. Repeat treatment at 30 day intervals if clothing is not stored in moth tight containers.

QUALITY TESTED

DIE-FLY[®]

Pyrethrin Insect Spray

ACTIVE INGREDIENTS:

| | |
|---------------------|---------|
| Pyrethrins I & II | .12% |
| *Piperonyl Butoxide | .60% |

© Reg. U.S. Pat. Off.

For Carpet Beetles, spray directly onto carpets and into cracks and crevices around base boards. Also spray underneath areas on the under side of carpets.

For Bedbugs, spray thoroughly and repeatedly directly onto beds and mattresses as well as hiding places in cracks and crevices in baseboards, walls and floors.

For Fleas, spray thoroughly around baseboards, on floors and floor coverings and areas of sleeping quarters.

CAUTIONS

Harmful if swallowed.
Do not use near an open flame, spark producing equipment, or a heated surface. Do not apply to farm animals or plants.

Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

WARRANTY

When used as directed, this product will kill and repel the insects named on the label. It is not a guarantee of performance under all conditions. The user should read the label carefully and follow the directions. The manufacturer is not responsible for the results obtained when the product is used in a manner not intended by the manufacturer.
