

# Endrin-Methyl Parathion Emulsifiable Concentrate

Contains 1.6# Endrin plus 1.6# Methyl Parathion per gallon

## ACTIVE INGREDIENTS:

*Endrin	18.3%
**O,O-dimethyl O-p-nitrophenyl phosphorothioate	18.3%
Xylene	57.4%
<b>INERT INGREDIENTS</b>	<b>6.0%</b>
	<b>100.0%</b>

\*hexachlorocyclohexane, endo dimethanonaphthalene      \*\*Methyl Parathion

## **DANGER: Keep Out of Reach of Children.**

**NOT FOR USE OR STORAGE IN OR AROUND THE HOME**

**DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME**

### **DANGER**

Poisonous by skin contact inhalation, or swallowing. Rapidly absorbed through skin. Repeated exposure may without symptoms, be increasingly hazardous.

### **DO NOT GET ON SKIN ON CLOTHING OR IN EYES**

Wear heavy natural rubber gloves and clean, waterproof or freshly laundered protective clothing (coveralls, cap, etc.) and goggles. Destroy and replace gloves frequently. Wash thoroughly with soap and warm water before smoking or eating. Bathe immediately after work and change all clothing. Wash clothing thoroughly with soap and water before reuse. In case of contact, immediately remove contaminated clothing and wash thoroughly with soap and warm water. In case of eye contact, flush with plenty of water.

### **DO NOT BREATHE DUST, VAPOR OR SPRAY MIST**

Use respirator of type passed by U.S. Bureau of Mines for Methyl Parathion and Endrin protection. Airplane pilots should wear full face, positive type mask. If harmful fumes, prove, or conditions limit ventilation, keep all persons out of operating area or vicinity where there may be danger of poisonous drift. Vacate area immediately on receipt and use of Methyl Parathion and Endrin emulsifiable concentrate.

### **DO NOT CONTAMINATE FOOD OR FOOD PRODUCTS**

Bury spillage. Clean up area with strong lye solution. Burn or bury containers. Never re-use. Stay out of smoke or fumes.

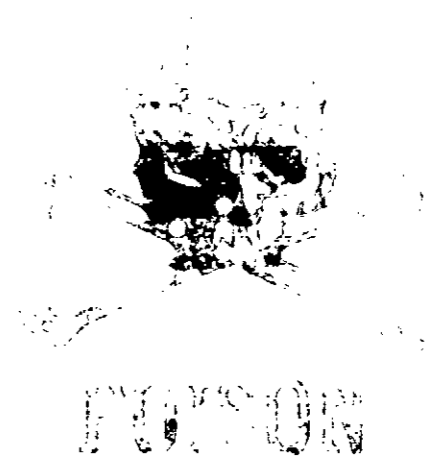

### **PHYSICIANS NOTE**

Treat Symptomatically

Warning symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive pin point pupils, salivating, nausea, vomiting, diarrhea and cramps.

Methyl Parathion is a cholinesterase inhibitor and treatment of poisoning should include the use of atropine in large dose to produce full atropinization and artificial respiration, if necessary. Endrin paralyses central nervous system, convulsions which responds rather well to almost any of the barbituric acid derivatives. The clinical acute period following Methyl Parathion poisoning lasts 24 to 48 hours. Acute toxic effects of both poisoning might well last several days if a weak or naive.

Repeated exposure to cholinesterase inhibitors may without warning cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until full cholinesterase regeneration has been established as determined by blood test.

Atropine is an antidote. Consult physician for emergency supply.

### **ANTIDOTE**

Call a physician at once in all cases of suspected Methyl Parathion poisoning. If symptoms or signs of poisoning include blurring vision, abdominal cramps and tightness in the eyes, do not wait for doctor, but give the atropine tablets as directed on the package. Remove victim from contact with Methyl Parathion. Remove contaminated clothing and wash skin thoroughly with soap and water. In case of ingestion of Methyl Parathion, induce vomiting if possible. Do not give anything by mouth if patient is unconscious. If patient is conscious, give small sips of water. Do not induce vomiting if patient has had a meal. If patient is unconscious, give small sips of water. Do not induce vomiting if patient has had a meal. If patient is unconscious, give small sips of water.

### **NOTICE OF WARRANTY**

This product is warranted to be effective under normal conditions of use. It is not warranted to be effective under conditions of use which are not normal. The warranty does not extend to any use of this product which is not in accordance with the directions on the label. The warranty does not extend to any use of this product which is not in accordance with the directions on the label. The warranty does not extend to any use of this product which is not in accordance with the directions on the label.

For use primarily with ground rigs. If airplane use is desired, use at least 3 to 10 gals water per acre.

This is a concentrated insecticide and must be diluted with water for use. Mix by adding to spray tank containing water with pump and agitator running. Before using study safety directions. Consult your physician about obtaining an adequate supply of 1/100 gr. Atropine tablets for emergency use.

### **DIRECTIONS FOR USE**

**FOR COTTON:** bollweevil, bollworm, thrips, fleahoppers, cutworms, grasshoppers, aphids, apply 1 to 2 pints per acre (depending on size of insects) at 3 to 7 day intervals or as necessary.

In the application, wear protective clothing and goggles. Destroy and replace gloves frequently. Wash thoroughly with soap and warm water before smoking or eating.

Do not get on skin or clothing or in eyes.

Do not breathe dust, vapor or spray mist. Use respirator of type passed by U.S. Bureau of Mines for Methyl Parathion and Endrin protection. Airplane pilots should wear full face, positive type mask. If harmful fumes, prove, or conditions limit ventilation, keep all persons out of operating area or vicinity where there may be danger of poisonous drift. Vacate area immediately on receipt and use of Methyl Parathion and Endrin emulsifiable concentrate.

Do not get on skin or clothing or in eyes. Do not contaminate body of water nor apply to any part specified on the label. Birds feeding on treated crops may be killed. Do not apply when there is a strong wind or drift from treated area. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of water.
