# TRIANGLE COPPER N-60

#### **EMULSIBLE CONCENTRATE**

Each gallon contains 5 lbs. Copper Naphthenate (Equivalent to 0.5 lbs. metallic copper per gallon)

#### **ACTIVE INGREDIENTS:**

Copper Naphthenate

(Equivalent to 6% Metallic Copper)

\*INERT INGREDIENTS

40%

\*(Petroleum solvents and emulsifiers.)

### CAUTION: Keep Out of Reach of Children.

A concentrated fungicide readily miscible with water for use in preservation of fabrics such as

#### DIRECTIONS FOR USE

For maximum preservation of fabrics, treatment should be such as to leave a residue of 0.5% metallic copper in the treated fabric when dry.

Thus one gallon will treat 1,000 pounds of fabric. The pleasing green color, imparted to fabrics is permanent in protected locations, but bleaches out when exposed to sun and weather. The preservative qualities are not lost by this bleaching—only the color is lost.

- A. For treating tarpaulins and shade cloth—Mix 1 gallon of Triangle CN-60 E. C. with 5 gallons of water and spray the solution evenly over 1,000 pounds of the material to be treated. Hang up to dry.
- B. For larger quantities, mix 1 gallon conentrate with 13 gallons of water. Dip material and immediately put through wringer or spin-dry. Then hang up to air dry
- C. For Nursery balling, maximum preservation is generally not required or desired. Dipping and spin drying as under "A" in a solution of 1 gal-

jute and cotton—for tarpaulins, sand bags, and jute squares for balling nursery stock.

lon concentrate to 40 gallons of water will preserve jute up to 1 year in soil tests and somewhat less in peat moss.

It is best to add fresh make up after each dipping as the copper naphthenate is preferentially absorbed on the material and the remaining solution progressively decreases in concentration.

#### **CAUTION**

Since petroleum oils tend to dry out the skin, contact should be avoided. Wash thoroughly with soap and warm water. Harmful if swallowed. Do not Re-use Container, Destroy when empty.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

#### WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but notified this warranty nor any other warranty of merchantability or faciess for a particular patpose, expressed in implied, extends to the use of this product contrary or label instructions, or under abnormal conditions, or under conditions too reasonably foresceable to the selies and large as most the risk of any such use
