PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING!

Harmful if swallowed. May be absorbed through skin. Causes skin irritation. Avoid breathing vapor or spray mist. Do not get in eyes, on skin, or on clothing.

STATEMENT OF PRACTICAL TREATMENT

If swallowed, do not induce vomiting. Call a physician immediately. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL AND CHEMICAL HAZARDS

Combustible: Keep away from heat, sparks or open flame. Use with adequate ventilation.

STORAGE AND DISPOSAL

Not for use or storage in or around the home environment. Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Triple-rinse container and offer for recycling, reconditioning, or disposal in approved landfill or bury in a safe place. Pesticide, spray mixture, or rinsate that cannot be used or chemically processed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Consult federal, state, or local disposal authorities for approved alternative procedures.

TRIANGLE CHEMICALS COPPER NAPHTHENATE CN - 60

EMULSIBLE CONCENTRATE

A concentrated fungicide readily mixable with water for use in preservation of fabrics such as jute and cotton - for tarpaulins, sand bags, and jute squares for balling nursery stock.

ACTIVE INGREDIENTS:

Copper Naphthenate 60%
(Equivalent to 6% Metallic Copper)

*INERT INGREDIENTS 40%

* (Petroleum solvents and emulsifiers.) 100%
Each gallon contains 5 lbs. Copper Naphthenate (Equivalent to 0.5 lbs. metallic copper per gallon)

**KEEP OUT OF REACH OF CHILDREN

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For maximum preservation of fabrics, treatment should be such as to leave a residue of 0.5% metallic copper in the treated fabric when dry.

Thus one gallon will treat 1,000 pounds of fabric. The pleasing green color, imparted to fabrics is permanent in protected locations, but bleaches out when exposed to sun and weather. The preservative qualities are not lost by this bleaching — only the color is lost.

A. For treating tarpaulins and shade cloth — Mix 1 gallon of Triangle CN60 E. C. with 5 gallons of water and spray the solution evenly over 1,000 pounds of the material to be treated. Hang up to dry.

B. For larger quantities, mix 1 gallon concentrate with 13 gallons of water. Dip material and immediately put through wringer or spin-dry. Then hang up to air dry.

C. For Nursery balling, maximum preservation is generally not required or desired. Dipping and spin drying as under "A" in a solution of 1 gallon concentrate to 40 gallons of water will preserve jute up to 1 year in soil tests and somewhat less in peat moss.

It is best to add fresh make up after each dipping as the copper naphthenate is preferentially absorbed on the material and the remaining solution progressively decreases in concentration.

WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
