Petroleum Distillate	95.90%
	100.00%

CENTRAL PETROLEUM COMPANY

CLEVELAND, OHIO • WYLLIE • WALCOTT, IOWA

DIRECTIONS FOR USE

Cen-Pe-Co Yard and Patio Spray is especially suited for application by Cen-Pe-Co Challenger or Whirlwind Foggers or other aspirating type fogging machines.

When fogging with this product maximum wind velocity should not exceed 3 to 4 miles per hour. In a light wind, spraying should be done with the wind. Under calm conditions spraying can be done in a circular area from the center.

To kill and repel flying insects — set machine for desired output, hold machine so nozzle points slightly downward and spray towards area to be covered from 6 to 10 feet away, allowing fog to drift over area. Breeding grounds such as refuse and garbage disposal facilities should be given special attention. For crawling insects — spray directly on infested surface of outdoor areas such as picnic grounds, patios and porches. It can also be sprayed on legs of outdoor furniture as a further aid in repelling insects.

KILLS AND REPELS FLIES, MOSQUITOES, ANTS, GNATS AND SMALL FLYING INSECTS IN OUTDOOR AREAS.

IMPORTANT — use only as directed.

Cen-Pe-Co Yard and Patio Spray is a quality insecticide developed expressly for fogging outdoor areas, where its extra strength formulation goes to work fast controlling pesty insects. Kills up to 40 feet when used in Cen-Pe-Co Challenger and Whirlwind Foggers or similar aspirating type units.

CAUTION

Keep Out of Reach of Children

Harmful, if swallowed. Avoid breathing of spray mist. Avoid prolonged or repeated contact with skin; wash thoroughly after using. Do not apply to or over food crops or feed crops. Do not use in or near dairy or beef animal buildings or installations.

Do not apply when weather conditions favor drift from area.

This product is toxic to fish. Do not contaminate ponds, rivers or other fish bearing waters with this material.

Dispose of any liquid wastes in a pit in non-crop lands located away from water supplies.

DO NOT SPRAY NEAR OPEN FLAME
