CEN·PE·CO

NET FIVE U. S. GALLONS

DIRECTIONS FOR USE

To develop an effective repellency to stable flies, horn flies, mosquitoes and gnats on dairy cows, apply 1 to 2 ounces to each animal daily for a three day period. The spray should be applied with a sprayer having adequate power to give the animal's entire body thorough and uniform coverage. Special care should be used in spraying the legs, belly and shoulders. Avoid areas around the nose, eyes and mouth. Avoid wetting the hide.

After the three day treatment has been completed, spray again in the same manner after two days have elapsed, and every second day thereafter, or when insects again disturb the animal. Be sure the teats and udder are washed with warm water prior to milking. Calves should be sprayed very lightly once a day instead of attempting to build up a residual repellency by spraying more heavily.

To kill flies, mosquitoes and gnats in the barn prior to milking, close all doors and windows and direct the spray toward the ceiling. The barn should remain closed for 10 to 20 minutes. Sweep up and destroy fallen insects. Repeat as necessary.

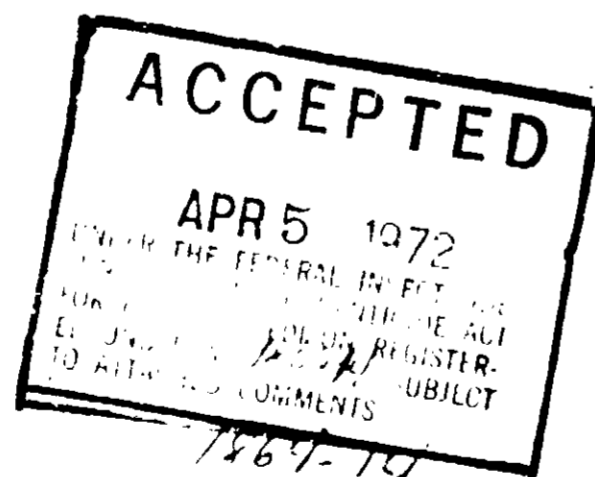

For treating dairy and beef cattle and horses, this product should be applied as a mist spray.

KILLS FLIES, MOSQUITOES, GNATS

Super 100

READ DIRECTIONS BEFORE USING

100% ACTIVE INGREDIENTS

Pyrethrins	10
Piperonyl butoxide, Technical*	20
N-octyl bicycloheptene dicarbodiimide	33
D, n-propyl isocinchonate	40
Petroleum Distillate	98.97
Total	100.00

* Consists of 16 bicyclic related compounds and other related compounds.

AN AID TO INCREASED PRODUCTION IMPORTANT — Use only as directed

Kills and repels horn flies, stable flies, mosquitoes and gnats. When applied as directed, the repellent effect against these insects will last a full two days. SUPER 100 Stock Spray acts quickly and efficiently to reduce the insect problem. It drives them away — keeps them away — and kills any that remain behind. It is easy to spray, never stains, leaves hide and hair in good condition and will not clog the sprayer.

CAUTION

Keep container tightly closed and out of reach of children. Harmful if swallowed, inhaled, or absorbed through the skin. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, food stuffs or water.

Apply with sprayer only. Do not spray on or near open flame. Avoid contamination of milk and milk handling equipment. Avoid overspraying which would result in wetting animals' hides.

DO NOT SPRAY NEAR OR TOWARD AN OPEN FLAME

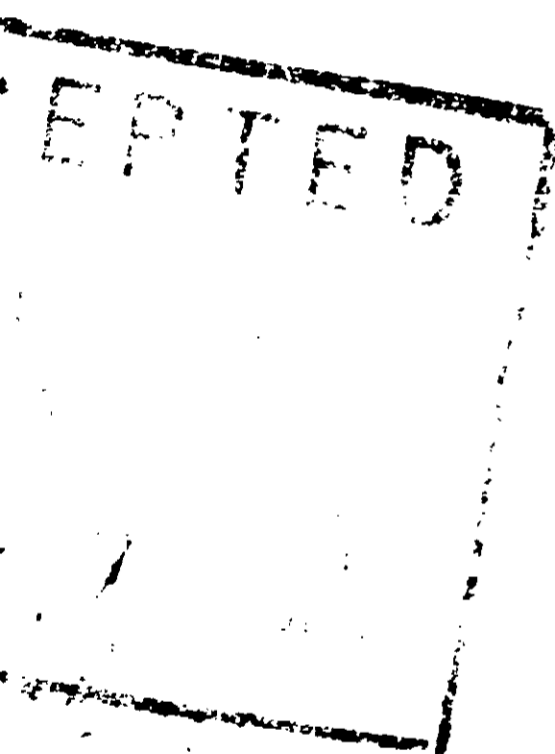

CAUTION: Do not reuse empty pail. Return to pail reconditioner or destroy by perforating or crushing and burying in a safe place.
