READ DIRECTIONS FOR USE
STORE IN COOL, DRY PLACE

A PROFESSIONAL FORMULATION prepared especially for home use ~~by Bruce-Terminix~~, the nationwide pest control service. Flushes bugs out of hiding, kills fast, keeps on killing.

DIRECTIONS FOR USE:

Household Insect Control

Roaches, Waterbugs, Silverfish, Spiders, Crickets — Use 2 tablespoons per gallon of water as a spot treatment to thoroughly spray infested cracks, baseboards, corners, pipes, areas behind shelving and bookcases, other hiding places and exposed surfaces where insects will crawl when they come out of hiding. Use spot treatments in closets and storage areas where there are no exposed foods. Repeat applications as necessary.

Ants, Box Elder Bugs — Use 3 tablespoons per gallon of water as a spot treatment to thoroughly spray around doorsills, window frames or wherever the insects may enter. Spot treat openings around water pipes, heat ducts, electrical outlets and baseboards where ants may come into room from wallspaces. Treat ant trails. Treat areas where box elder bugs crawl or congregate on porches and sides of houses. Repeat applications as necessary.

Outdoor Insect Control — Lawns, Exterior Surfaces of Buildings, Non-Agricultural Areas

White Grubs, June Beetle Grubs, Japanese Beetle Grubs, Sod Webworms, Grasshoppers, Cut Worms, Ants and Crickets — Use 1 tablespoonful per gallon of water per 150 square feet of area and spray thoroughly.

Mosquitos and Chiggers — Mix 3 tablespoonfuls with 1 gallon of water and apply to lawn, turf and shrubbery per 1,000 square feet of area. For mosquitos, application may also be made to walls and ceilings of porches, carports, garages and storage sheds. Do not use in dairy barns and poultry houses.

Wasps — Use 6 tablespoons per gallon of water and liberally spray wasp nesting sites such as under eaves, porches, sheds and garage. To avoid possible stings, treat after dark when insects are at rest.

NOTE — Birds feeding on treated areas may be killed.

Termite Control

Mix 1 part Chlordane Water Emulsifiable Concentrate with 95 parts water. Stir and apply as follows:

- (a) In crawl space areas apply 2 gallons per 5 lineal feet in a trenching application to critical areas such as along the inside of foundation walls and around piers and utility entrances. Trenches should be dug to 30 inch depth, but not below the top of the footing if this is shallower. If trench is deeper than 15 to 18 inches, apply 4 gallons per 5 lineal feet.

2.

- (b) Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the top of the footing is not more than 15 to 18 inches deep. If the footing is over 15 to 18 inches deep, dig trench to 20 inch depth, but not below the top of the footing, if this is shallower and apply 4 gallons per 5 lineal feet.
- (c) Apply 1 gallon per 5 lineal feet to voids of unit masonry foundations and piers.
- (d) Inspect areas yearly to determine possible re-infestation.

CAUTION: Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Keep out of reach of children. Keep children, pets and domestic animals off treated lawn until the insecticide is washed off the grass into the soil by sprinkling or rain and grass is completely dry.

This product is toxic to fish and wildlife. Keep out of any body of water. Apply this product only as specified on the label.

ANTIDOTE: External - In case of spillage on skin, wash promptly with soap and water.

Internal - Emetic of 1 tablespoonful mustard in tumbler of water. Call a Physician.
