Ear mites usually induce the formation of a dry dark brown waxy exudate with crusts in the ears of pets. Ear mites may be detected by placing some of the ear exudate on a dark surface and carefully watching for movement of tiny white specks away from the exudate. Inflamed, watery or blocked ear canals indicate a more serious condition which requires the services of a veterinarian.

Directions for use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ ENTIRE LABEL BEFORE EACH USE. USE ONLY ON DOGS, PUPPIES, CATS, KITTENS, FERRETS AND RABBITS.**

To Kill Ear Mites And Ticks: Clean ears to remove build up of wax and dirt. While firmly holding pet, and avoiding contact with pet's eyes, carefully fill the ear canal with approximately 110 drops depending on the size of the pet. Massage base of ear for a few minutes to permit penetration of the ear wax by the solution. Allow pet to shake its head to remove as much solution as possible. Wipe excess from the ear with cotton. Repeat treatment every other day until condition has cleared up or as directed by your veterinarian. If no improvement is seen, consult a veterinarian. This solution applied twice monthly will reduce the possibility of ear mite infestation and the accumulation of ear wax.

Storage: Store in a cool, dry area, away from heat or open flame.

Disposal: If empty: Do not reuse container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency or 800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
