

PRECAUTIONARY STATEMENTS

WARNING

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

May be fatal if swallowed. Do not breathe vapor, dust or spray mist. Do not get in eyes, on skin or clothing. In case of skin contact, wash immediately with soap and water. Avoid contamination of feed and foodstuffs.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS:

Do not use, pour, spill or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Keep away from heat and open flame.

DISPOSAL:

- 1. PROHIBITIONS:** Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.
- 2. PESTICIDE DISPOSAL:** Pesticide spray mixture, or rinse water that cannot be used according to label instructions must be disposed of according to Federal or approved state procedures under Subtitle C of the Resource Conservation and Recovery Act.
- 3. CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved state and local procedures.
- 4. GENERAL:** Consult Federal, State or Local disposal authorities for approved alternative procedures.

TERMINIX A4

Only for sale to and use and storage by commercial pest control applicators.

ACTIVE INGREDIENTS:

Aldrin*	42.0%
Aromatic Petroleum Derivative Solvent	50.0%

INERT INGREDIENTS:

Total 100.0%

*Equivalent to 39.9% Hexachlorocyclohexene, endo, iso, dimethanonaphthalene and 2.1% of related compounds.

KEEP OUT OF REACH OF CHILDREN

WARNING

STATEMENT OF PRACTICAL TREATMENT

- If swallowed**—Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. **DO NOT INDUCE VOMITING.** Vomiting may cause aspiration pneumonia.
- If inhaled**—Remove victim to fresh air. Apply artificial respiration if indicated.
- If on skin**—Remove contaminated clothing and wash affected areas with soap and water.
- If in eyes**—Flush eyes with plenty of water. Get medical attention immediately.

SUBTERRANEAN TERMITE CONTROL DIRECTIONS FOR USE

Only For Use And Storage By Commercial
Pest Control Operators

TERMINIX A4 is a highly effective, fast-acting, and long-lasting termiticide. It is used to control subterranean termites in wood structures. The active ingredient is hexachlorocyclopentadiene-endo-endo dimethanonaphthalene. TERMINIX A4 is a contact and stomach poison. It kills termites on contact and when ingested. It is also a repellent, preventing termites from entering treated areas. TERMINIX A4 is used in a variety of applications, including soil treatments, wood treatments, and bait stations. It is important to follow the directions for use carefully to ensure effective control of termites.

Preconstruction Subterranean Termite Treatment

Preconstruction treatment is used to protect new construction from termites. It involves treating the soil around the foundation and the wood structure itself. This treatment creates a barrier that prevents termites from entering the structure. It is important to apply the treatment correctly to ensure it is effective. The treatment should be applied to the soil around the foundation and to the wood structure itself. It should be applied in a continuous layer that completely covers the area. The treatment should be applied before the structure is completed, so that it can protect the structure from the start.

TERMINIX A4 is a highly effective, fast-acting, and long-lasting termiticide. It is used to control subterranean termites in wood structures. The active ingredient is hexachlorocyclopentadiene-endo-endo dimethanonaphthalene. TERMINIX A4 is a contact and stomach poison. It kills termites on contact and when ingested. It is also a repellent, preventing termites from entering treated areas. TERMINIX A4 is used in a variety of applications, including soil treatments, wood treatments, and bait stations. It is important to follow the directions for use carefully to ensure effective control of termites.

Postconstruction Treatments:

Postconstruction treatments are used to control termites in existing structures. They involve treating the soil around the foundation and the wood structure itself. This treatment creates a barrier that prevents termites from entering the structure. It is important to apply the treatment correctly to ensure it is effective. The treatment should be applied to the soil around the foundation and to the wood structure itself. It should be applied in a continuous layer that completely covers the area. The treatment should be applied after the structure is completed, so that it can protect the structure from the start.

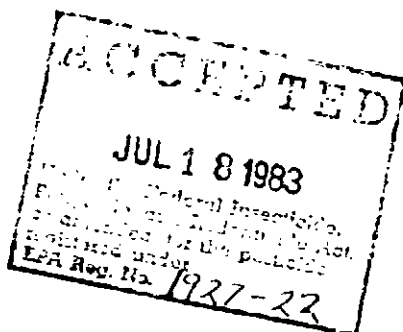

TERMINIX A4 is a highly effective, fast-acting, and long-lasting termiticide. It is used to control subterranean termites in wood structures. It is also a repellent, preventing termites from entering treated areas. TERMINIX A4 is used in a variety of applications, including soil treatments, wood treatments, and bait stations. It is important to follow the directions for use carefully to ensure effective control of termites.

Retreatment Restrictions

Retreatment restrictions are in place to ensure the safety and effectiveness of the treatment. It is important to follow these restrictions carefully. Retreatment should only be done if necessary, and it should be done correctly. The treatment should be applied to the soil around the foundation and to the wood structure itself. It should be applied in a continuous layer that completely covers the area. The treatment should be applied after the structure is completed, so that it can protect the structure from the start.
