CODE #2902

USDA REG #1941-17

Spray until wet surfaces that are infested or to be protected. This material may be applied to all areas considered necessary for effective control.

Directions For Use — RESISTANT ROACHES, ANTS, SILVERFISH, WATERBUGS, SPIDERS, CRICKETS. Spray directly on insects where possible. Also spray to wet insect trails and surfaces wherever insects may breed or congregate such as under sinks, drainboards, stoves, refrigerators, in cabinets, around baseboards, door sills and frames, window frames, garbage cans, garages, and outbuildings. Allow residue to remain undisturbed as this will continue to kill crawling insects for weeks. Retreat as necessary.

BED BUGS: Spray mattress and bedding lightly including seams and folds. Spray bed frames, springs, along baseboards, carpet edges, cracks, and hiding places about rooms. Retreat as necessary. Treated mattresses are to be aired for at least four hours before use.

CARPET BEETLES: Apply to floor areas and baseboards. Spray directly into cracks, crevices, and under carpets where insects may be found. Treat both the underside and topside of infested carpets. Spray inside of trunks, closets and infested areas of shelving. Retreat as necessary.

FLIES, MOSQUITOS, WASPS: Spray directly on insects where possible. Spray on light fixtures, window screens, and other areas where insects may be found. Retreat as necessary.

FLEAS, BROWN DOG TICKS: Spray directly on insects where possible. Retreat as necessary.

PANTRY PESTS: Apply to infested areas. Retreat as necessary.
