CREOSOTE

DIRECTIONS

Wood to be treated should be dry, well seasoned and free of bark.

Application can be made by Dip, Brush or Spray. Most effective method is Dipping least effective by Spraying.

For Dipping—soak as long as possible, minimum of 5 minutes per inch of thickness and 48 hours for fence posts, with temperature of liquid as warm as practicable. The thicker the timber, the longer it should soak.

For Brush or Spray—Apply two liberal coats especially at cut ends, checks and knots.

WARNING

Harmful if swallowed or absorbed through skin. Causes skin irritation. Do not breathe vapor, fumes or spray mist. Do not get into eyes, on skin or on clothing. Wash thoroughly with warm water and soap. Inflammable. Avoid open flame. Don't smoke while using. Avoid contamination of food and feedstuffs. Keep away from children. Care should be taken in application to avoid grass and shrubbery. This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate water supplies by cleaning of equipment or disposal of waste & container. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

ANTIDOTE: In case of swallowing administer antidote such as milk, raw egg white, gruel or corn starch paste. Follow with an emetic such as a tablespoonful of mustard in a glass of warm water. Call physician.
