

DIRECTIONS FOR USE

HOUSEHOLD

RESISTANT AND NON-RESISTANT COCKROACHES

DURSBAN[®] Insecticide mixes readily with water or oil. Dilute the required amount of DURSBAN[®] in water or in a base oil such as deodorized kerosene or No. 2 fuel oil. Mix according to the following table to obtain the desired concentration of 0.25% or 0.50% DURSBAN[®] Insecticide. Use the higher concentration (0.50%) to quickly reduce heavy cockroach infestations and the lower concentration (0.25%) on light infestations.

Amount of DURSBAN[®] to use

Amount of Spray Mixture Desired	for 0.25% spray	for 0.50% spray
1 gal.	2 2/3 ounces	5 1/3 ounces
3 gal.	8 ounces	16 ounces
5 gal.	12 ounces	24 ounces
10 gal.	24 ounces	48 ounces

Use as a spot treatment by applying as a coarse spray or with a paint brush, to areas where cockroaches normally are found. These areas include dark corners of rooms and closets, at the base of walls, in cracks in the wall, behind baseboards, behind and beneath china, refrigerators, stoves and cabinets, and around drain-pipes. Apply in a manner to avoid spray or mist contacting food, feedstuff and water supplies. Dishes and food handling utensils should be thoroughly washed in soap and water if they have become contaminated by the application of this product. Repeat treatment as needed.

NOTE: A period of 4 to 7 days after treatment is normally required for maximum effect on cockroaches.

LAWNS AND TURF

CHINCH BUGS AND SOD WEB WORMS

Apply DURSBAN[®] Insecticide uniformly over the turf with sprayer according to the rates indicated in the accompanying table. Make the first treatment when the insects first appear and re-treat as needed. The lawn should be moist at the time of application.

USE RATE AND DILUTION TABLE

Area to be Treated	Amount of DURSBAN [®] Required	Dilute with Water to Give
1,000 sq. ft.	3 fl. oz.	20 gals.
5,000 sq. ft.	15 fl. oz.	100 gals.
10,700 sq. ft.	1 quart	300 gals.
One acre	1 Gallon	1300 gals.

APPLICATION WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

CRACK AND CREVICE TREATMENT ONLY:
 Mix 5-1/3 ounces of Dursban 1E in 1 gallon of water
 (0.50% concentration). Apply a small amount of
 material directly into cracks and crevices such as
 expansion joints between different elements of
 construction or between equipment bases and the floor,
 wall voids, motor housing junction boxes or switch
 boxes, conduits or hollow equipment legs where roaches
 hide.

Care should be taken to avoid depositing the product
 onto exposed surfaces or introducing the material
 into the air. Avoid contamination of food or food
 processing surfaces.

Applications of this product in the food areas of
 food handling establishments, other than as a crack
 and crevice treatment, are not permitted.

**CAUTION: Keep children and pets off treated areas
 until the spray has dried.**

This product is toxic to fish and wildlife. Keep out
 of any body of water. Birds feeding on treated areas
 may be killed. Apply this product only as specified
 on this label. Do not contaminate water by cleaning
 equipment or disposal of waste. Promptly crush empty
 containers and bury them in locations isolated from
 water.

Seller warrants that the product conforms to its
 chemical description and is reasonably fit for the
 purpose stated on the label when used in accordance
 with directions under normal conditions of use, but
 neither this warranty nor any other warranty of
 MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE,
 express or implied, extends to the use of this product
 contrary to label instructions, or under abnormal
 conditions, or under conditions not reasonably fore-
 seeable to seller, and buyer assumes the risk of any
 such use.

Do not use in animal buildings, poultry houses or in
 edible product areas of food processing plants, except
 for crack and crevice treatment. (See directions).
