

GENERAL INSTRUCTIONS

This product is a liquid, non-selective, persistent general herbicide designed for use where control of all vegetation is desired. It is recommended for non-crop areas such as fence rows, parking lots, around buildings, loading ramps, storage yards, tank farms, along pipelines, industrial plant sites and other similar areas where grasses and weeds interfere with drainage, create a fire hazard or cause unsightly appearance.

This liquid weed killer is composed of chlorinated phenols, 5-bromo-3-sec-butyl-6-methyluracil (bromacil) and a low volatile 2,4-D ester in a phyto-toxic oil. The oil carrier combines the properties of low volatility with rapid penetration and translocation in the plant. The insolubility of the herbicide in water assures full effect regardless of rainfall after application or stage of growth at the time of application.

The liquid produces rapid kill of all succulent vegetation. Translocation and root absorption of component herbicides produce extensive root kill of weeds and provide long term residual control.

This liquid may be applied at any time of the year except when the ground is frozen. Best results are obtained after predominant weeds have emerged and developed to a point where they present a problem. The product should be applied as is. No agitation or dilution is necessary and any equipment from sprinkler can to complicated sprayer may be used. Equipment should be calibrated so as to assure application of the recommended amount of material.

This liquid weed killer when used according to directions will provide low cost convenient and complete weed control for a season or more. Sprayed vegetation is no more flammable than vegetation destroyed by mowing or other mechanical means. Because of the fast re-vegetation it is unlikely that sprayed vegetation will be used for livestock.

ELCO ALLOUT LIQUID WEED KILLER

For recommendations use: For annual weeds and grasses such as crabgrass, foxtail, barnyard grass, sandspur and pigweed use 1 to 2 gal. per 1000 sq. ft. (10 to 80 gals. per acre).

Perennial weeds and grasses such as smooth brome, quackgrass, Canada blue grass, green crabgrass, dandelion, goldenrod, plantain, wild carrot and purpletop use 2 to 4 gal. per 1000 sq. ft. (20 to 100 gals. per acre).

For other hard to kill perennial weeds and grasses such as Johnsongrass, saltgrass, Bermudagrass, horsetail, bouncing bet and bracken fern use 3 to 6 gal. per 1000 sq. ft. (30 to 200 gals. per acre).

CAUTION

This liquid may cause skin irritation. Avoid contact with skin, eyes, and clothing.

Do not inhale vapors. Do not eat, drink, or smoke while using. Wash hands after use.

Wash all clothing washed with soap and water. For spills, flush with large amounts of water. Avoid contact with eyes and nose.

Do not use in areas where the product will be applied to areas where children play or where animals are kept.

Do not apply this liquid to areas where the roots of desirable plants such as trees or ornamentals are likely to contact with it as injury might result. Do not use on lawns, lawns, walks, or other areas where it may drift to susceptible plants as this product may injure cotton, beans, etc. Do not contaminate domestic water or irrigation water and keep from contact with fertilizers, insecticides, fungicides and seeds. Vapors from this product may injure susceptible plants in the immediate vicinity. Coarse sprays are less likely to drift.

Do not use in areas where the product will be applied to areas where children play or where animals are kept.

Do not use in areas where the product will be applied to areas where children play or where animals are kept.

Do not use in areas where the product will be applied to areas where children play or where animals are kept.

CAUTION: KEEP OUT OF REACH OF CHILDREN
See side panel for other warnings

ACTIVE INGREDIENTS:

Mixed aliphatic hydrocarbons	0.25
2,4-Dichlorophenoxyacetic acid (isooctyl ester)	0.09
Pentachlorophenol	0.80
Other chlorophenols	0.39
Bromacil (5-bromo-3-sec-butyl-6-methyluracil)	0.25
INERT INGREDIENTS	0.29
	100.00

2,4-D isomer is 0.70
