

[1989-2]

Industrial General Purpose Insect Spray contains piperonyl butoxide and pyrethrins. It is an effective, fast-acting insecticide for the control of roaches, and the other listed injurious and annoying insects found in homes, institutions and buildings.

Industrial General Purpose Insect Spray is highly useful for insect control in residences, institutions, public buildings, hospitals, hotels, clubs, restaurants, stores, markets, theaters and other places.

CAUTION

Use this product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

Do not spray on skin or on animals. In case of skin contact, wash with soap and water. Avoid contamination of feed and foodstuffs. Remove birds, fish bowls and pets from room being sprayed. Avoid prolonged inhalation.

ACTIVE INGREDIENTS: 100.00%

Flying insects such as flies, mosquitoes, house flies, and certain bees and wasps can be controlled by spraying the upper portions of the room and saturating the atmosphere with the insecticide. Allow 2 ounces to each 1000 cubic feet of space.

For Crawling Insects To control roaches, silverfish, crickets, spiders, spray infested areas thoroughly and direct the liquid behind base-boards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Sanco Industrial Spray is an excellent insecticide for use as a vapor, fog or mist spray in special generators. Regulate dosage in accordance with equipment manufacturers directions for the particular type of applicator employed. Application should be sufficient to fill the enclosure with the fog, mist or vapor.

Industrial General Purpose Insect Spray kills by contact.
