

### GENERAL DIRECTIONS

For cleaning, disinfecting and deodorizing in one operation: Note: Heavy soil deposits and gross filth are to be removed from surfaces prior to application of the disinfecting solution. On surfaces such as floors, walls, woodwork, stoves and baking equipment, bathroom areas, a solution of 2 to 4 ounces of STAPH-O-SAN to 1 gallon of water will clean, disinfect and deodorize in one operation. After cleaning rinse and allow to dry.

For Disinfecting: Mix one ounce of STAPH-O-SAN with one gal. of water. Thoroughly wet surfaces to be disinfected. Safe on conductive floors, and all surfaces that water will not harm.
