INERT INGREDIENTS:	
Total Ingredients	100.00%

When used as directed this product is effective as a pool water disinfecting agent.
The filter system should be backwashed or properly cleaned and the pH adjusted between 7.4 and 7.6.
It is recommended that the pool be stabilized with 40-50 ppm trihydroxy triazine to nullify the disinfection effect of sunlight on chlorine. When using this product, both chlorine and trihydroxy triazine are being added to the water; however, it is necessary to initially stabilize pools with 40-50 ppm of trihydroxy triazine to effectively maintain the desired concentration of stabilizer.

DIRECTIONS

Use 4 ounces of SUPER SOLUBLE ORGANIC CHLORINE CONCENTRATE per 10,000 gallons of water as an initial treatment. Repeat as required to establish a residual of 1.0 to 2.0 ppm of available chlorine as determined by test kit. The regular use of the test kit will aid in determining when it is necessary to add more of the chlorine concentrate to maintain a residual of 1.0 to 2.0 ppm of available chlorine in the pool water. An average is 2.3 ounces of this product per 10,000 gallons of water daily.
The use of a quaternary ammonium type algicide will complement this total program of swimming pool maintenance.
If a need for superchlorination is indicated, use 1 pound of this product per 10,000 gallons of water.

POISON

HAZARD: Irritant.
EXTERNAL: Skin and eyes. Irritation. Avoid contact with water.
INTERNAL: Large amounts of milk, fat, meat, etc. may be irritating.
First Aid: If in eyes, flush eyes with water. If on skin, wash with soap and water. If in mouth, do not induce vomiting. If swallowed, drink water. If inhaled, get fresh air. If on clothing, do not get in eyes. If on skin, wash with soap and water. If in mouth, do not induce vomiting. If swallowed, drink water. If inhaled, get fresh air. If on clothing, do not get in eyes.
Do not breathe dust. Destroy by burning or by other means. Do not smoke or drink.
