

DIRECTIONS FOR USE

Clean all grain from bin, then thoroughly clean behind all partitions, walls, and try to sweep out all grain stuck in cracks in the floor. Check outside and under granary for grain that might have sifted out of the bin and if any is found, clean it up. Then plug up the holes in the bin.

After the bin has been cleaned, then spray all of the inside surfaces with CO-OP BIN SPRAY until the walls are wet, but not to the run-off point. Be sure to spray removable doors, behind false walls. 1 gallon covers approx. 500 sq. ft. of surface area.

If possible, it is well to spray at least two weeks before storing grain. This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

CONTENTS FIVE GALLONS

MADE ESPECIALLY FOR TREATING EMPTY GRAIN BINS BEFORE FILLING WITH GRAIN

<b>ACTIVE INGREDIENTS: 100%</b>	
Petroleum Hydrocarbon Oils .....	95.00%
Methoxychlor, Technical* .....	5.00%
<b>TOTAL .....</b>	<b>100.00%</b>

\*Equivalent to 4.4% 2,2-bis (p-methoxyphenyl)-1,1,1-trichloroethane and 0.6% isomers and reaction products.

CAUTION

Keep out of reach of children

See blue panel for additional precautionary labelling

For the control of cadelles, confused flour beetles, flat grain beetles, granary weevils, fungus beetles, lesser grain borers, red flour beetles, rice weevils and saw-toothed grain beetles which are exposed or become accessible by emerging from burrows and cracks of woodwork after thoroughly cleaning empty grain storage bins.

Caution: Harmful if Swallowed

Do not use or store near heat or open flame.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.
