

particularly in cracks and behind baseboards. Use coarse nozzle spray, syringe or oil can to apply to cracks. Remove food and food containers and utensils before spraying in kitchen cabinets and around stoves. Repeat applications as necessary.

FOR HOUSE ANTS: Apply thoroughly around doors and windows, particularly to cracks around door and window casings. For small red ants treat around baseboards and all other cracks likely to be used by the ants. Roach and Ant Liquid is not a repellent but kills the ants that contact the treated areas. Repeat applications as necessary.

OR CARPET BEETLES: Use as for roaches on localized areas of floors, baseboards, and cracks under carpets where insects may be found. Repeat as needed.

FOR SUBTERRANEAN TERMITES: Thoroughly soak infested areas. If possible, dig a trench 1 to 2 feet deep and 8 to 12 inches wide next to foundation walls. Apply 1 gallon to each linear foot of trench and treat the soil as the trench is refilled. Inspect premises annually for reinfestation and repeat application as needed.

NOTICE: Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
