GOOD-WAY PYRETHRIN-TYPE DAIRY SPRAY CONCENTRATE EMULSIFIABLE

For the protection of dairy cattle from biting flies and lice and for control of flies in barns, stables and poultry houses. Protects against hornflies, stableflies, horseflies, houseflies, gnats, mosquitoes, and both blood sucking and biting lice.

Good-Way's Pyrethrin-Type Dairy Spray Concentrate Emulsifiable is used at dilutions of 1 to 25 with water. The spray is used on dairy cattle, poultry, and swine. It can be applied in a fogging machine or directly to the animal. It is a fast-acting treatment that kills and repels hornflies, stableflies, horseflies, houseflies, gnats, mosquitoes, and both blood sucking and biting lice. It is safe for the animal and does not require a special odor or taste.

For the protection of dairy cattle from biting flies and lice and for control of flies in barns, stables and poultry houses. Protects against hornflies, stableflies, horseflies, houseflies, gnats, mosquitoes, and both blood sucking and biting lice.
