

-- CAUTION --

In areas accessible to children, pets and domestic animals, the bait should only be exposed in protective bait stations. If swallowed by humans, domestic animals, or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such case, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin.

This rodenticide contains Warfarin an anticoagulant chemical that reduces the clotting ability of the blood and, upon repeated feedings, cause fatal hemorrhage in rats and mice. It also contains an antibacterial agent which inhibits bacteria that produce Vitamin K, an antidote for Warfarin. It thereby increases effectiveness against hard-to-kill rats and mice and gives better and more thorough control.

U. S. D. A. REG. NO. 2006-43

ACTIVE INGREDIENTS:

Warfarin, (3-[<i>o</i> -acetonylbenzyl]-4-hydroxy-	
coumarin)	0.025%
N-(2-quinoxaliny) sulfanilamide (sulfiquinoxaline)	0.025%
INERT INGREDIENTS	99.950%
	TOTAL 100.000%

CAUTION: KEEP OUT OF REACH OF CHILDREN
SEE BACK PANEL FOR COMPLETE CAUTION
STATEMENT AND ADDITIONAL INFORMATION

CUT ALONG DOTTED LINE

--- DIRECTIONS ---

This is a prepared rat and mouse bait.
 Place baits in locations not accessible to children, pets, and domestic animals, or in tamper-proof bait boxes.
RATS: Bait generously. Place 4 to 6 ounces of GOOD-WAY *PROlin*® Bait in any container in burrows, in runways, or where rats are accustomed to feed. Assure an uninterrupted supply of bait for a period of not less than 12 days and continue baiting until all signs of feeding have stopped. Replace stale, damp or moldy baits with fresh bait.
MICE: Place tablespoonful amounts of GOOD-WAY *PROlin*® Bait in shallow containers where mice or signs of mice have been seen. Bait stations at intervals of 8 to 12 feet are recommended. Assure an uninterrupted supply of bait for a period of not less than 15 days. Mice are nibblers, so make plenty of bait placements to assure continuous feeding.

PROlin® is a registered trademark of the Wisconsin Alumni Research Foundation for a rodenticide
