Active Ingredients . . . . . 100%  
Petroleum Hydrocarbons  
Piperonyl Butoxide-Technical\*  
Pyrethrins  
\*Consists of (Butylcarbityl)(6-propylpiperonyl) ether and related compounds.

Remove or cover fish bowls and aquaria before and for approximately one (1) hour after treatment.  
An excellent contact insecticide effective for use in either electric or hand sprayers.

### DIRECTIONS

To kill **ROACHES, WATERBUGS, CRICKETS, SPIDERS**: Spray freely with force around refrigerators, sinks, cabinets, shelves, cracks and crevices, pipe openings or any other likely place these insects might hide.  
To kill **FLOUR MOTHS, ETC., ACCESSIBLE STAGES OF CERTAIN STORED PRODUCT PESTS**: Apply freely to empty bins, chutes and elevator shafts, to walls and floors with particular attention to cracks, crevices, columns and ceilings, between joists, as well as all spaces around and under equipment.  
To kill **FLIES, MOSQUITOES, GNATS**: Direct the spray upward toward the ceiling.

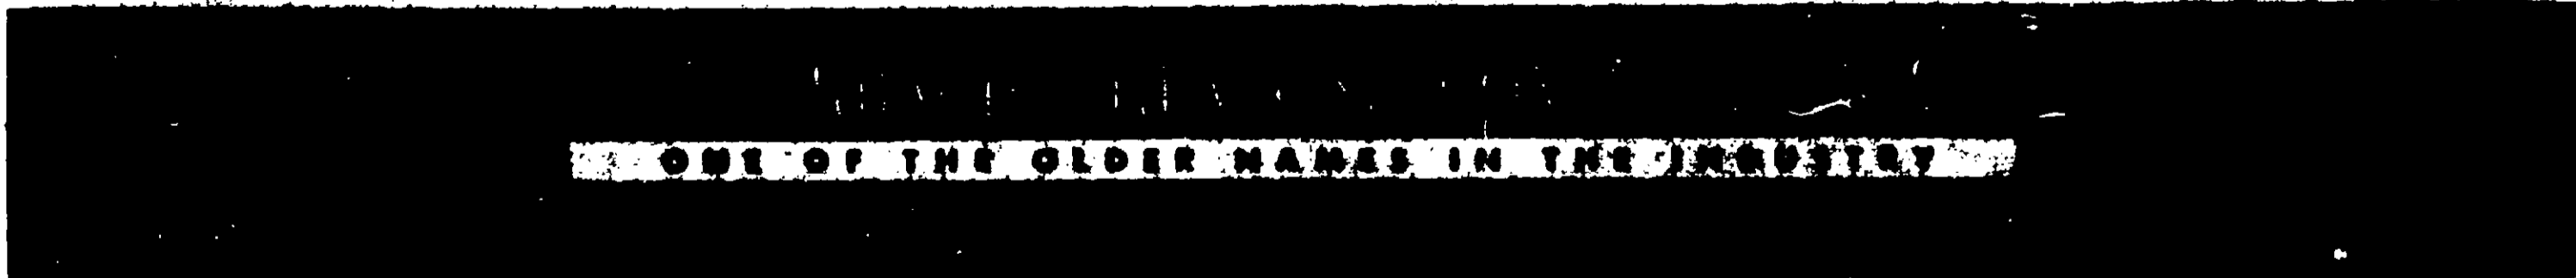

Keep doors and windows closed for effective results for at least twenty minutes after spraying. Sweep up dead or stupefied insects and destroy them. CI-66 may be used in food processing areas provided the foods are covered. Do not spray directly on food-stuffs. Repeat treatment as often as necessary. Keep away from heat and open flame. Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.
