DIRECTIONS FOR USE

THIS PRODUCT is a high-strength chemical solution which will protect wood against deterioration caused by dry rot, damp rot and similar wood-rotting fungi. It is available in GREEN and DIPPING GREEN for surfaces not intended to be top-coated with paint. They are effective rot inhibitors and when thoroughly dry are non-toxic to plant life.

APPLICATION—Use treatment as received without thinning for best protection. Small objects should be immersed in a dip tank sufficiently long to obtain deep penetration (3 minutes minimum). Large wood objects like fence posts should be soaked for 12 to 48 hours.

CAUTION: THIS PRODUCT CONTAINS AN INFLAMMABLE SOLVENT: THEREFORE, KEEP AWAY FROM FIRE OR FLAME, AND DO NOT SMOKE DURING APPLICATION. ALWAYS PROVIDE PLENTY OF MOVING FRESH AIR TO CARRY OFF EVAPORATING SOLVENTS WHILE DRYING. AVOID BREATHING CONCENTRATED VAPORS FOR LONG PERIODS. If surface is to be top-coated with paint, be sure correct formula is used. KEEP OUT OF THE REACH OF CHILDREN.

May cause skin irritation. Avoid prolonged or repeated contact with skin. KEEP AWAY FROM EYES AND MOUTH. IF CHEMICAL SOLUTION GETS IN EYES OR MOUTH SEE DOCTOR IMMEDIATELY. Avoid prolonged or repeated breathing of vapor, fumes, or spray mist. USE WITH ADEQUATE VENTILATION. HARMFUL IF SWALLOWED.
