USDA Reg. No. 2124-377

COPPER-SULPHUR PEANUT 4-80 DUST

DIRECTIONS FOR USE

For control of leafspot and leafhoppers on peanuts apply as follows:

PEANUTS: For leafspot and leafhopper control apply 15-20 lbs. of peanut dust per acre at two to three week intervals depending on weather conditions. If cool and damp, applications should be made at 2 week intervals for a total of four applications or 70 lbs. of dust. If weather is normal to dry, three applications totalling 50 lbs. will usually give maximum results. Apply early in the morning or late afternoon when wind is moderate.

North Carolina — Bunch or Runner Types: Make first application during first 10 days of July. On Spanish Types dusting should be started 10 days earlier. 15-20 lbs. per acre per application.

ACTIVE INGREDIENTS:

Copper (derived from Copper oxide) expressed as metallic	4%
Sulphur	80%

INERT INGREDIENTS

INERT INGREDIENTS	16%
TOTAL	100%

CAUTION:
KEEP OUT OF REACH OF CHILDREN

AVOID BREATHING DUST. AVOID EXCESSIVE SKIN CONTACT. WASH OFF THOROUGHLY AFTER EXPOSURE.

Avoid contamination of feed and foodstuffs.

Dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed by burying with wastes. Apply this product only as specified on this label.

DIRECTIONS (continued)

Virginia — Runner Varieties: 3 applications starting July 15th to August 1st.

Virginia — Bunch: 4 applications starting July 5th to 15th. Spanish Types: 4 applications starting July 10th to 20th. 15-20 lbs. per acre per application.

Do not feed treated forage to dairy animals or to livestock being finished for slaughter.

NOTICE: Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
