**DIRECTIONS FOR USE (continued)**

water at the time of transplanting tobacco. It readily mixes with water and stays in suspension. Used in the recommended manner it will create a protective barrier around the newly set plant and protect the roots from wireworm damage.

**TOBACCO** (On newly set plants): Add 2 fluid ounces Naco Tobacco Transplant Liquid to each 50-gallon barrel of water. Mix thoroughly. Use 1/2 pint of the treated water around each plant, being careful to wet the soil to the surface.

**NOTICE:** Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

**TOBACCO TRANSPLANT LIQUID**

(Contains 5.6 ounces Lindane per Gallon)
