and Deer

R E P E L L E N T

Protects:

NURSERY STOCK - FRUIT TREES - ORNAMENTALS

Against Feeding Damage by:

RABBITS - DEER - MEADOW MICE

ACTIVE INGREDIENT

Zinc dimethylthiocarbamate-

cyclohexylamine complex*

INERT INGREDIENTS

Total

* Equivalent to 3.2% metallic zinc.

Net Contents: 8 fl. ounces

1 pint

1 quart

Makes up to 1½ gallons spray.

" " " 3 gallons spray.

" " " 6 gallons spray.

CAUTION: KEEP OUT OF REACH OF CHILDREN

See other cautions on back panels.

BACK PANELS

READ ENTIRE LABEL BEFORE USE. OBSERVE ALL CAUTIONS.

SHAKE WELL BEFORE USING. Keep container tightly closed to prevent evaporation. Keep from freezing. Clean application equipment immediately after use.

GENERAL INFORMATION

Science Rabbit and Deer Repellent is an effective chemical repellent which gives long-lasting protection against the feeding damage caused by these animals. They do not like the bitter taste of bark or vegetation treated with this chemical. They will remember the taste. They will not swallow foliage or bark treated with it.

A small amount, properly applied, protects a large area. This product is highly resistant to rainfall.

A single application remains effective for a long

(p.2)

time, depending on weather and other conditions.

Use Science Rabbit & Deer Repellent to protect nursery stock, tree seedlings, ornamentals such as flowers and shrubs, fruit and vegetable plants, grape vines, and bush fruits from feeding damage caused by rabbits, deer, and to a lesser extent meadow mice.

DIRECTIONS FOR USE

AS A SPRAY

Shake well before dilution and before spraying. Treat only plant parts which animals can reach.

GROWING SEASON. Mix 4 oz. in 3 qts. water. Spray with ordinary hand or power sprayer on nursery stock, tree seedlings, ornamentals, and on fruit and vegetable plants until edible parts appear. Do not apply after edible parts begin to form. Do not use on foliage intended for food or feed use. Border Treatment. This product may be used as a border treatment for vegetables, greens, fruits, and berries to protect from feeding damage. Spray just the outside borders of such plantings. THESE SPRAYED PLANTS MUST BE BURNED OR DISCARDED AND MUST NEVER BE USED FOR FOOD OR FEED PURPOSES.

DORMANT SEASON. Use 8 oz. in 1½ pts. water or 1 pt. in 3 pts. water. Apply after leaves begin to fall, but before snow, on nursery stock, fruit trees, grape vines, ornamentals, tree seedlings, and bush fruits. If necessary, apply again in late winter.

AS A PAINT

Especially effective for protecting bark in dormant season when rabbits tend to girdle trees or shrubs. Mix equal parts Repellent and water. Treat bark to a height which rabbits might reach during heavy snow.

CAUTION. May be harmful if swallowed or inhaled. Avoid breathing spray. May cause irritation of nose, throat and skin. Avoid contact with eyes, skin, clothing. Flush with plenty of water. For eyes, get medical attention.

NOTICE. Seller makes no warranty, express or implied, concerning effects of use of this product. Buyer, or User, assumes all risks of handling or use of this product, whether in accordance with directions or not.
