FLY SPRAY

A A GRADE

ALSO KILLS MOSQUITOES, ANTS AND BEDBUGS

ACTIVE INGREDIENTS 100%
Petroleum Distillate
N-Octyl bicycloheptene dicarboximide
*Technical Piperonyl Butoxide
Pyrethrins
*Consists of (Butylcarbiyl) (6-propylpiperonyl) ether and related compounds.

DIRECTIONS

FLIES AND MOSQUITOES

1. Cut off all ventilation possible.
2. Spray toward ceiling. Fill room with foggy mist.
3. Wait 10 minutes. Sweep out dead insects and burn them as soon as possible. They harbor disease germs.
4. Keep garbage pails and other such places tightly closed to prevent drawing insects.

BEDBUGS

1. Take beds apart. Spray slats, springs and into crevices. Spray entire surface of mattress, particularly seams and tufts. Air until dry.
2. Spray into cracks and crevices of walls and floors—behind loose wall paper, baseboards, window frames, and other hiding places.
3. Repeat as necessary.

ANTS AND FLEAS

1. Spray liberally into cracks and crevices of walls and floors, and other hiding places.
2. Spray directly on the insects whenever possible.
3. Spray animal beds or sleeping areas.
4. Repeat when necessary.

CAUTION: KEEP OUT OF REACH OF CHILDREN
DO NOT SPRAY ON OR NEAR OPEN FLAME.
HARMFUL IF SWALLOWED.
