DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Recommended for use in schools, hospitals, institutions and industry.

For best results all dirt and fish must be removed before disinfecting. NOTE: Keep tightly closed when not in use. When warm, disinfectant may become cloudy but will clear up when cooled. This does not impair its efficiency.

For Disinfecting Rooms, Toilet Seats and Waste areas Around Plants: Pour 1 part disinfectant into a pail. Add 100 parts of water (4 ounces disinfectant to 12 quarts water). Stir the milky solution before using. Apply solution with a sponge, cloth or by mopping. Wet all surfaces thoroughly and allow to stand for 10 minutes, then use.

For Disinfecting Toilet Seats: Pour 4 ounces of the undiluted disinfectant into bowl water. Swab toilet bowl with the solution completely using a scrub brush or mop making sure to get under the rim, and let stand for at least 10 minutes. Flush toilet and rinse mop several times.

For Scrubbing: Use one 4-ounce cup of disinfectant to a 12 quart pan of water (add water to disinfectant). No rinsing required except on rubber or asphalt tile. Rinse for best shine on no-wax floors.

When solution is prepared, prepare only amount needed for job at hand. Discard at end of day or when visibly dirty.
