

DIRECTIONS

To control most weeds and grasses on non-cropland areas such as railroad right-of-ways and industrial sites for an extended time, apply 43.5 gallons per acre of undiluted WEED KILLER after the most predominant weeds have emerged. No agitation is required. This WEED KILLER can be applied with railroad on-track, truck mounted, or other standard spraying equipment. For treating small areas, tank-type hand sprayer or sprinkling can may be used.

Users should consult State Agricultural Experiment Stations or Extension Service Weed Specialists for recommendations as to use of this WEED KILLER in their particular area.

IMPORTANT: Do not apply directly to, or otherwise permit this WEED KILLER to contact susceptible plants as this product may injure cotton, beans, peas, grapes, flowers, fruit trees, ornamentals, or other desirable plants. Avoid spray drift to such susceptible plants (coarse sprays are less likely to drift). Vapors from this product may injure susceptible plants in the immediate vicinity. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same equipment for other purposes). Do not store near fertilizers, seeds, insecticides or fungicides. Do not re-use this container.

This WEED KILLER is toxic to fish and wildlife. Do not contaminate any body of water.

CONDITIONS OF SALE

All statements concerning the use of this product apply only when used as directed.

The manufacturer makes no warranties, expressed or implied, concerning this product or its use, which extends beyond the description on the label. Read all directions carefully.
