Attention: Theresa Matassa

Gentlemen:

Subject: Algaecide 1250  
EPA Registration No. 2155-73  
Your Submission Dated August 7, 1990  
EPA Received Date August 10, 1990

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you submit five (5) copies of your final printed labeling before you release the product for shipment.

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. Your release for shipment of the product bearing the amended labeling constitutes acceptance of this condition.

A stamped copy of the labeling is enclosed for your records.

**DIRECTIONS:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**INITIAL DOSE** - 1 gallon of this algicide to 50,000 gallons of water. Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

**MAINTENANCE DOSE** - Add at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently. If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of this algicide for each 10,000 gallons of fresh make-up water added per week. When swimming season is over, add 1 gallon of this algicide to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

**FISH AND/OR WILDLIFE PRECAUTIONS:** This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label. When this algicide is used as directed, it will kill and prevent development of *Chlorella Pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngba versicolor* (blue-green) and other swimming pool algae. This algicide may be used to sanitize pool areas such as walkways, diving boards, ladder rails and walls and floors in dressing areas. Prepare a sanitizing solution by mixing 1 ounce of this algicide with 4 gallons water. Apply with mop, cloth or sponge to those previously cleaned areas to be sanitized.

This algicide is effective against *Trichopython interdigitale*, a causative agent of athlete's foot, at a dilution of 1 3/4 ounces per gallon on water. This algicide is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners or premixed with other water treating chemicals. This algicide works best when added by itself directly to pool water. This algicide at use is non-corrosive to inanimate surfaces.

# Algaecide 125

**Concentrated Swimming Pool Algaecide**  
**KEEPS POOL WATER CLEAR AND FREE OF VISIBLE ALGAE**  
**CONTROLS ALGAE SLIMES**

**ACTIVE INGREDIENTS:**

n-Alkyl (60% C<sub>12</sub>, 30% C<sub>14</sub>, 5% C<sub>16</sub>, 5% C<sub>18</sub>) dimethyl benzyl ammonium chlorides

n-Alkyl (68% C<sub>12</sub>, 32% C<sub>14</sub>) dimethyl ethylbenzyl ammonium chlorides

**INERT INGREDIENTS:**

KEEP OUT OF REACH OF CHILDREN

**DANGER**

SEE LEFT PANEL FOR ADDITIONAL PRECAUTIONS.
