Section IV

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application).

Name

John J. Walker, Ph. D.

Title

Director of Research

 Telephone No. (Include Area Code)
 (404) 351-4705

 6. Date Application Received
 (Stamped)

Certification
 I certify that the statements I have made on this form and all attachments thereto are true, accurate, and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.

2. Signature

3. Title

Director of Research

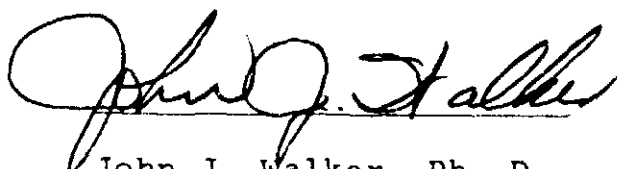

4. Typed Name

John J. Walker, Ph. D.

5. Date Signed

1 Sep 1995

I certify that this notification is consistent with PR 95-1 and EPA regulations at 40 CFR 152.46 and that no other changes have been made to the labeling of this product. I further understand that if this notification is not consistent with the terms of PR Notice 95-1 and 40 CFR 152.46, then this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

A handwritten signature in dark ink, appearing to read "John J. Walker". The signature is fluid and cursive, with a large initial "J" and "W".

John J. Walker, Ph. D.
Director of Research

DIRECTIONS: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

INITIAL DOSE - 1 gallon of this algaecide to 50,000 gallons of water. Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

MAINTENANCE DOSE - Add at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of this algaecide for each 10,000 gallons of fresh make-up water added per week. When swimming season is over, add 1 gallon of this algaecide to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the

winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

FISH AND/OR WILDLIFE PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label. When this algaecide is used as directed, it will kill and prevent development of *Chlorella Pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii* (Square D algae), *Cynghe versicolor* (blue-green) and other swimming pool algae. This algaecide may be used to sanitize pool areas such as walkways, diving boards, ladder rails and walls and floors in dressing areas. Prepare a sanitizing solution by mixing 1 ounce of this algaecide with 4 gallons of water. Apply with mop, cloth or sponge to those previously cleaned areas to be sanitized.

This algaecide is effective against *Trichophyton interdigitale*, a causative agent of athlete's foot, at a dilution of 1 3/4 ounces per gallon on water. This algaecide is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners or premixed with other water treating chemicals. This algaecide works best when added by itself directly to pool water. This algaecide in use is non-corrosive to inanimate surfaces.
