

When this product is used as directed it will aid in controlling and/or preventing the development of unsanitary algae slime conditions which are unsightly, produce foul odors and which are often the cause of equipment breakdown.

It is compatible with virtually all corrosion inhibition additives, but should not be used in the presence of soap or other anionic detergents. This product at use dilution is non-corrosive to inanimate hard surfaces.

DANGER — Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID — In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

NOTE TO PHYSICIAN - Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

W.T.C. ALGAECIDE and ALGAL SLIMICIDE

**CONCENTRATED ALGAECIDE FOR INDUSTRIAL RE-CIRCULATING
WATER COOLING TOWERS.**

**HELPS KEEP WATER COOLING TOWER SYSTEMS CLEAR AND FREE
OF VISIBLE ALGAE SLIMES.**

ACTIVE INGREDIENTS:	
n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides	5.0%
n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides	5.0
INACTIVE INGREDIENTS:	90.0
	100.0%

DANGER: KEEP OUT OF REACH OF CHILDREN.
See Other Precautionary Statements on Side Panels.
Rinse Empty Container Thoroughly With Water and Discard.

ACCEPTED

FOR INSTITUTIONAL OR INDUSTRIAL USE ONLY.

APR 10 1975

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTER-
ED UNDER NO. 2155-74

DIRECTIONS FOR USE

Begin treatment when the system is in jeopardy of becoming affected or after cleaning system efficiency is already impaired.

Initial Dose: 1-2 gallons solution to each 5,000 gallons of water contained in the system (20-40 ppm active quaternaries). Repeat until control is evident.

Periodic Dose: When system is in control, add 1-3 quarts solution to each 5,000 gallons of water (5-15 ppm active quaternaries) contained in the system every 7 days or sooner should visible growth appear.

For best results, clean heavily contaminated systems before treatment with this product. If soap or anionic detergent is used, rinse thoroughly before charging with this product. Apply solution at a point in the system where uniform mixing will take place.

Do not be alarmed with the sudden appearance of organic debris in the system during the first week of operation. This is normal and is a good indication that the solution has effectively penetrated and dislodged dead organic material which tenaciously adheres to metal and wooden surfaces as living matter. This debris should be removed from the system to avoid clogging of screens and pipes.

FISH AND/OR WILDLIFE PRECAUTIONS

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label.
