

Handwritten notes on the left margin:
 Use a pump gun to apply this material. Do not use a sprayer. Apply to the soil. Do not apply to foliage.

DIRECTIONS

Chlordane is new, powerful and effective in controlling insects two ways—by contact and when eaten. Apply 10% Chlordane Dust as it comes from the gun, simply cut the label where indicated and use as a pump gun.

FOR GARDEN SOIL: To control wireworms, white grubs, Japanese beetle grubs, root maggots on radishes, onions and cabbage work into top 2 or 3 inches of soil when preparing seed bed. One pound will treat 1000 square feet. Remains effective all season.

FOR FOLIAGE DUST: To control grasshoppers, thrips

CUT ON THIS LINE

and plant bugs on rosebuds, flowers, shrubs and other ornamentals dust directly on the plant and insect. Repeat as necessary to prevent damage.

FOR BULB TREATMENT: Before storing bulbs and for treatment just before planting to control thrips on Dahlias, Gladiolus, Hyacinths, Tulips, and most flowering bulbs, place a few bulbs in a strong paper bag, dust a tablespoonful of 10% Chlordane Dust on the bulbs, close opening and then shake vigorously.

CRABGRASS CONTROL: Apply 15 lbs. to each 1000 square feet of lawn or turf to suppress crabgrass seedlings before germinating or sprouting occurs. Use as an early season preventative treatment—not effective for control of growing crabgrass plants. Timing of application is important and should be applied before any germinating occurs, which in many areas is during the period April 15th to May 1st. To be safe apply before April 15th. This treatment will not burn or injure established lawns. Keep children and pets off treated areas until this material has been completely watered into the soil and the grass has completely dried.

FOR LAWNS: To control ants, chinch bugs and chiggers, dust lightly at the rate of 1 pound to 1000 square feet of area. Repeat as necessary. For white grubs, Japanese beetle grubs and sod webworm

10% CHLORDANE DUST

A HANDY GARDEN - LAWN - SOIL INSECTICIDE

Active Ingredients:

*Technical Chlordane	10%
Inert Ingredients	90%
<hr/>	
Total	100%

*Equivalent to 6% Octachloro-4,7-Methano-tetrahydroindane and 4% related compounds.

DIRECTIONS

IN THE GARDEN: To control cutworms, earwigs, mole crickets, sowbugs, millipedes, and leaf cutting ants, dust liberally on the ground ~~around corn, potatoes and ornamentals~~. Remains effective at least 10 days. Repeat as necessary. ~~Do not~~

Use in garden as top dressing. It is not suitable for use in lawns. It will not control weeds. It will control insects. It will control insects on lawns. It will control insects on lawns. It will control insects on lawns.

Dust on the bulbs, close opening and then shake vigorously.
