

An oil base concentrate containing 20% chlordane by weight in an odorless petroleum distillate. When properly applied as a 2% solution it will effectively control exposed stages of flies, mosquitos, gnats, ants, roaches, silverfish, flour beetles, granary and rice weevil, cadelle and other similar stored products insects.

DIRECTIONS

To prepare the 2% oil spray dilute one gallon Patterson's 20% Chlordane Concentrate with 10 gallons of petroleum distillate or deodorized kerosene.

FLIES, MOSQUITOS, GNATS: To control these insects, tightly close all doors and windows and apply a 2% chlordane solution as a fine mist in all parts of the room, particularly toward the ceiling so as to fill the room with a fine mist. Leave closed for ten to fifteen minutes after spraying. To prepare a more effective space spray, a knockdown agent such as Pyrethrins may be added. Repeat as needed. (THIS PARAGRAPH APPLICABLE TO PEST CONTROL OPERATORS ONLY, AS AN INDUSTRIAL APPLICATION. DO NOT USE IN BUILDINGS WHERE UNPROTECTED OR UNPACKAGED FOOD OR FEED IS STORED.)
